U.S. Postage by the Page

Mailing costs are a growing part of a writer's expenses. One way to keep costs down is to use only the necessary amount of postage—even when the Post Office is closed. With the information below, you can avoid the last minute deadline tactic of over-stamping.

These charts can help save time as well as money by allowing you to figure the fees for sending your manuscripts to prospective publishers in your home office rather than standing in line at the Post Office. A good supply of stamps in denominations of 29¢** and 23¢ can save you unnecessary trips to postal stations.

Postage rates are listed by numbers of pages in 20 lb. paper according to the most commonly used envelopes and their SASEs. While most writers prefer to send their work First Class, Third Class is a good choice, too; it moves more slowly but costs less than First Class after the first four ounces. Also, it is permissible in Third Class to include a letter pertaining to the material inside.

First Class mail weighing more than 33 ounces is assessed according to weight plus geographical zone, so it needs to be priced at the Post Office.

Another way to save money is on the return SASE. If the postage costs are higher than duplicating costs, a #10 stamped envelope or a postcard (19¢) can be used for the editor's reply.

For short manuscripts or long queries, use a #10 (business-size) envelope with a 29¢ stamp. Four pages is the limit for that postage, if you are including a SASE. Another option is the 6×9 envelope. For 1-3 pages, postage is 29¢; for 4-7 pages with SASE, the cost is 52¢.

Computer disks may be sent in official mailers or mid-size envelopes with stiffening for 75¢.

See inside back cover for Canadian Postage by the Page.

* This cost includes a 10¢ assessment for oversized mail that is light in weight.

** A postage increase proposed for 1995 will likely raise the cost of a first-class stamp to 32¢. All other postal rates will increase accordingly—to about 10½% higher than current rates. Check with your local post office for exact rates.

From the Editors

Writers are a fortunate lot. What other business allows and even encourages such shameless whim-following as does the business of freelance writing? One writer makes the rounds with a New York City exterminator for the sake of a story. Another navigates the Amazon in a dugout canoe—again, for the story. Still another prefers to gather his facts in a less exotic locale—the stacks of his local library. And for some, of course, the journey is not in the real world at all, but along a path through the imagination. The appeal of being a writer is obvious: Writers enjoy the luxury of pursuing their interests.

When a writer's interests match the interests of an editor and the editor's audience, publication generally follows. Luckily, for the thousands of writers pursuing their own ideas, there are outlets for nearly every kind of writing (always excepting, of course, *bad* writing). There is a magazine published to match almost every special interest imaginable, and you would be hard-pressed to think of a topic that has not been the subject of a book.

Learning about the broad range of publishing opportunities available to writers is one of the most interesting and encouraging aspects of working on *Writer's Market*. We are always gratified to see each year's deluge of new *Writer's Market* listings funneling into our offices, a sure sign that, while individual publishers and periodicals may come and go, the market for freelance writing remains vibrant. And with the explosion of electronic publishing, multimedia and interactive media gathering steam, writers can expect an even wider market for their work in the future.

We are pleased to offer again this year thousands of markets (including more than 700 new ones) for writing of every description. Every listing in the book reflects the most current information available about the market at press time. Whether you're writing mainstream how-to books or searching out obscure corners of your world for article ideas, you'll find book publishers and magazines in this year's *Writer's Market* that publish on subjects you want to write about. And we'll give you plenty of tips on how to contact the listed publishers and improve your chances of making sales.

In order to make room for the increased number of book and magazine publishers' listings in this year's *Writer's Market*, we have temporarily removed the Literary and "Little" section of Consumer Magazines. For information on literary magazine markets, check *Novel & Short Story Writer's Market*, published every spring, and *Poet's Market*, published every fall.

As always, we provide a wealth of added features that will help you understand the publishing industry and approach it professionally. The articles in the first section of the book are designed to teach you the ins and outs of the writing business. In Getting Published, you'll learn all the basics, including how to target likely markets for your ideas, how to grab an editor's interest with queries and book proposals, how to format your manuscripts for submission and much more. Current Trends in Publishing clues you in to the state of the book and magazine publishing industries. The Business of Writing offers advanced information for writers who know the basics and would like to brush up on topics—including copyright, contracts, finances and taxes—that are typically of concern to writers who are already selling their work. Our updated How Much Should I Charge? feature returns, with pages of specific figures

and advice to help you set your freelance fees. In "A Writer's Guide to Money," successful freelancer Gary Provost talks frankly about the money you can expect to make as a writer and how you might make more.

Along the way, you'll read interviews with editors and successful writers offering tips that will help you get published. Our interview subjects this year include a first-time novelist, book publishing executives from small and large presses, a first-time nonfiction book author, successful magazine freelancers, magazine editors and a film director. These experienced voices offer useful insights into the expectations and realities of today's publishing marketplace.

Whatever direction your writing takes you, *Writer's Market* is here to help you find a market and an audience for your work. We wish you success in reaching your writing goals in 1995.

How to Get the Most Out of *Writer's Market*

Writer's Market is here to assist you in deciding where and how to submit your writing to appropriate markets. Each individual listing contains information about the editorial focus of the market, how they prefer material to be submitted, payment information and other helpful tips.

Where to start

A quick look at the Table of Contents will familiarize you with the arrangement of *Writer's Market*. The three largest sections of the book are the market listings of Book Publishers; Consumer Magazines; and Trade, Technical and Professional Journals. You will also find sections for scriptwriting markets, syndicates and greeting card publishers. Be sure to read the introduction for each section before you turn to the listings. The section introductions contain specific information about trends, submission methods and other helpful resources for the material included in that section.

Narrowing your search

After you've identified the market categories you're interested in, you can begin researching specific markets within each section.

Publishers listed in the Book Publishers section are categorized, in the Book Publishers Subject Index, according to types of books they are interested in. If, for example, you plan to write a book on a religious topic, simply turn to the Book Publishers Subject Index and look under the Religion subhead in Nonfiction for the names and page numbers of companies that publish such books.

Consumer Magazines and Trade, Technical and Professional Journals are categorized by subject to make it easier for you to identify markets for your work. If you want to publish an article dealing with some aspect of retirement, you could look under the Retirement category of Consumer Magazines to find an appropriate market. You would want to keep in mind, however, that magazines in other categories might also be open to your article (for example, women's magazines publish such material as well). Keep your antennae up while studying the markets: less obvious markets often offer the best opportunities.

Interpreting the markets

Once you've identified companies or publications that cover the subjects you're interested in, you can begin evaluating specific listings to pinpoint the markets most receptive to your work and most beneficial to you.

In evaluating an individual listing, first check the location of the company, the types of material it is interested in seeing, submission requirements, and rights and payment policies. Depending upon your personal concerns, any of these items could be a deciding factor as you determine which markets you plan to approach. In addition to this information, many listings also include a reporting time. This lets you know how long it will typically take for the publisher to respond to your initial query or submission. (We suggest that you allow an additional month for a response, just in case your

submission is under further review or the publisher is backlogged.)

Check the Glossary at the back of the book for unfamiliar words. Specific symbols and abbreviations are explained in the table on page 54. The most important abbreviation is SASE—self-addressed, stamped envelope. Always enclose one when you send unsolicited queries, proposals or manuscripts. This requirement is not included in most of the individual market listings because it is a "given" that you must follow if you expect to receive a reply.

A careful reading of the listings will reveal many editors are very specific about their needs. Your chances of success increase if you follow directions to the letter. Often companies do not accept unsolicited manuscripts and return them unread. Read each listing closely, heed the tips given, and follow the instructions. Work presented professionally will normally be given more serious consideration.

Whenever possible, obtain writer's guidelines before submitting material. You can usually obtain them by sending a SASE to the address in the listing. You should also familiarize yourself with the company's publications. Many of the listings contain instructions on how to obtain sample copies, catalogs or market lists. The more research you do upfront, the better your chances of acceptance, publication and payment.

Additional help

This year's book contains articles on making money with your writing, current trends in book and magazine publishing and much more. "Insider Reports"—interviews with writers, editors and publishers—offer advice and an inside look at publishing. Some listings contain editorial comments, indicated by a bullet (•), that provide additional information about the listings discovered during our compilation of this year's *Writer's Market*.

Minding the Details offers valuable information about rights, taxes and other practical matters. New or unpublished writers should also read Before Your First Sale. There is also a helpful section titled How Much Should I Charge? that offers guidance for setting your freelance writing fees.

Getting Published

Before Your First Sale

Many writers new to the craft feel that achieving publication—and getting paid for their work—is an accomplishment so shrouded in mystery and magic that there can be little hope it will ever happen to *them*. Of course, that's nonsense. All writers were newcomers once. Getting paid for your writing is not a matter of learning a bit of privileged information or being handed the one "key" to success by an insider. There's not even a secret handshake.

Making money from your writing will require three things of you:

- Good writing;
- Knowledge of writing markets (magazines and book publishers) and how to approach them professionally;
- Persistence.

Good writing without marketing know-how and persistence might be art, but who's going to know if it never sells? A knowledge of markets without writing ability or persistence is pointless. And persistence without talent and at least a hint of professionalism is simply irksome. But a writer who can combine the above-mentioned virtues stands a good chance of not only selling a piece occasionally, but enjoying a long and successful writing career.

You may think a previously unpublished writer has a difficult time breaking into the field. As with any profession, experience is valued, but that doesn't mean publishers are closed to new writers. While it is true some editors are partial to working with certain writers, most are open to professional submissions and good ideas from any writer, and quite a few magazine editors like to feature different styles and "voices" in their publications.

In nonfiction book publishing, experience in writing or in a particular subject area is valued by editors as an indicator of the author's ability and expertise in the subject. Again, as with magazines, the idea is paramount, and new authors break in every year with good, timely ideas.

As you work in the writing field, you may read articles or talk to writers and editors who give conflicting advice. There are some norms in the business, but they are few. You'll probably hear as many different routes to publication as writers you talk to. You could easily drive yourself crazy trying to do, or not do, everything you're told.

The following information on submissions has worked for many writers, but it's not the *only* method you can follow. It's easy to get wrapped up in the specifics of submitting (should my name go at the top left or right of the manuscript?) and fail to consider weightier matters (is this idea appropriate for this market?). Let common sense and

courtesy be your guides as you work with editors, and eventually you'll develop your own most effective submission methods.

Targeting your ideas

Writers often think of an interesting story, complete the manuscript and then begin to look for a suitable publisher or magazine. While this approach is common for fiction, poetry and screenwriting, it reduces your chances of success in many other writing areas. Instead, try choosing categories that interest you and study those sections in *Writer's Market*. Select several listings that you consider good prospects for your type of writing. Sometimes the individual listings will even help you generate ideas.

Next, make a list of the potential markets for each idea. Make the initial contact with markets using the method stated in the market listings. If you exhaust your list of possibilities, don't give up. Reevaluate the idea, revise it or try another angle. Continue developing ideas and approaching markets with them. Identify and rank potential markets for an idea and continue the process.

As you submit to the various periodicals listed in *Writer's Market*, it's important to remember that every magazine is published with a particular slant and audience in mind. Probably the number one complaint we hear from editors is that writers often send material and ideas that are completely wrong for their magazines. The first mark of professionalism is to know your market well. That knowledge starts here in *Writer's Market*, but you should supplement that by searching out back issues of the magazines you wish to write for and learning what specific subjects they have published in past issues and how those subjects have been handled.

Prepare for rejection and the sometimes lengthy wait. When a submission is returned, check your file folder of potential markets for that idea. Cross off the market that rejected the idea and immediately mail an appropriate submission to the next market on your list. If the editor has given you suggestions or reasons as to why the manuscript was not accepted, you might want to incorporate these when revising your manuscript.

About rejection. Rejection is a way of life in the publishing world. It's inevitable in a business that deals with such an overwhelming number of applicants for a limited number of positions. Anyone who has published has lived through many rejections, and writers with thin skin are at a distinct disadvantage. The key to surviving rejection is to remember that it is not a personal attack—it's merely a judgment about the appropriateness of your work for that particular market at that particular time. Writers who let rejection dissuade them from pursuing their dream or who react to each editor's "No" with indignation or fury do themselves a disservice. Writers who let rejection stop them do not publish. Resign yourself to facing rejection now. You will live through it, and you will eventually overcome it.

Query and cover letters

A query letter is a brief but detailed letter written to interest an editor in your manuscript. It is a tool for selling both magazine articles and nonfiction books. With a magazine query you are attempting to interest an editor in your writing an article for her periodical. A book query's job is to get an editor interested enough to ask you to send in either a full proposal or the entire manuscript. [Note: Some book editors accept proposals on first contact. Refer to individual listings for contact guidelines.] Some beginners are hesitant to query, thinking an editor can more fairly judge an idea by seeing the entire manuscript. Actually, most editors of nonfiction prefer to be queried.

Dear Mr. Clement:

When you think of the Ohio River, what comes to mind? Tug boats and coal barges? Steamboats? Pearl diving?

Pearl diving?

Yes. In 1981, oyster beds totalling more than 700 tons were relocated from the mid-Atlantic coast to a twenty-mile stretch of the Ohio River east of Cincinnati. Under the watchful eye of the Ohio Department of Fisheries, the oyster population has flourished, and this quirky transplant to the Midwest is now a booming mini-industry. The oysters are harvested—for food and for pearls—by a group of highly-paid seasonal workers who have come to the region from as far away as the South Pacific to ply their traditional trade.

The divers who risk their lives harvesting the oysters are a fascinating study, and I would like to write about them for *Ohio Outdoors Today*. Thousands of miles from home, they spend up to five hours a day on the floor of the river. Dressed only in swim trunks, and with canvas bags slung across their shoulders, the divers scour the riverbed for mature oysters, dodging debris and groping their way through the often murky water. They are paid well for their trouble—up to $40,000 a year. Yet they miss their homes.

I am a freelance writer who has covered the Ohio outdoor scene for local and regional publications. I would like to tell your readers about the Ohio pearl divers, their exotic occupation and their fascinating lives. I can deliver the completed article, at any desired length from 1,000 to 3,000 words, two months after assignment. Photos can be included if you wish. I look forward to hearing from you.

Sincerely,

Walter J. Fehn

There is no query formula that guarantees success, but there are some points to consider when you begin. Queries should:

- Be limited to one page, single-spaced, and address the editor by name (Mr. or Ms. and the surname).
- Grab the editor's interest with a strong opening. Some magazine queries begin with a paragraph meant to approximate the lead of the intended article.
- Indicate how you intend to develop the article or book. Give the editor some idea of the work's structure and contents.
- Let the editor know if you have photos available to accompany your magazine article (never send original photos—send duplicates).
- Mention any expertise or training that qualifies you to write the article or book. If you've published before, mention it; if not, don't.
- End with a direct request to write the article (or, if you're pitching a book, ask for the go-ahead to send in a full proposal or the entire manuscript). Give the editor an idea of the expected length and possible delivery date of your manuscript.

Fiction is sometimes queried, but most fiction editors don't like to make a final decision until they see the complete manuscript. Most editors will want to see a synopsis and sample chapters for a book, and a complete manuscript of a short story. If a fiction editor does request a query, briefly describe the main theme and story line, including the conflict and resolution of your story.

Some writers state politely in their query letters that after a specified date (slightly beyond the listed reporting time), they will assume the editor is not currently interested in their topic and will submit the query elsewhere. It's a good idea to do this only if your topic is a timely one that will suffer if not considered quickly.

For more information about writing query letters, read *How to Write Irresistible Query Letters*, by Lisa Collier Cool (Writer's Digest Books).

A brief single-spaced cover letter enclosed with your manuscript is helpful in personalizing a submission. If you have previously queried the editor on the article or book, the cover letter should be a brief reminder, not a sales pitch. "Here is the piece on digital recording technology, which we discussed previously. I look forward to hearing from you at your earliest convenience."

If you are submitting to a market that considers unsolicited complete manuscripts, your cover letter should tell the editor something about your manuscript and about you—your publishing history and any particular qualifications you have for writing the enclosed manuscript.

Once your manuscript has been accepted, you may offer to get involved in the editing process, but policy on this will vary from magazine to magazine. Most magazine editors don't send galleys to authors before publication, but if they do, you should return the galleys as promptly as possible after you've reviewed them. Book publishers will normally involve you in rewrites whether you like it or not.

Book proposals

Most nonfiction books are sold by book proposal, a package of materials that details what your book is about, who its intended audience is, and how you intend to write it. Most fiction is sold either by complete manuscript, especially for first-time authors, or by two or three sample chapters.

The nonfiction book proposal includes some combination of a cover or query letter, an overview, an outline, author's information sheet and sample chapters. Editors also want to see information about the audience for your book and about titles that compete with your proposed book.

Take a look at individual listings to see what submission method editors prefer. If

INSIDER REPORT

Scott Smith's simple publishing plan: storytelling, hard work and good fortune

Hank, Jacob and Lou, the three main characters in Scott Smith's first novel, *A Simple Plan* (Alfred A. Knopf, 1993), stumble across the wreckage of a small plane in a secluded Ohio woods. Inside the plane are a dead pilot and over $4 million in cash. In the time it takes to entertain a second thought, the trio discard a notion to turn the money in to authorities. Hank devises a "simple plan" that will allow the three to split the money and avoid detection. Needless to say, things don't proceed according to plan. The rest of the book is a study in expedient morality, paranoia, and Sam Peckinpah-style bloodshed. *A Simple Plan* is a startling and skillfully constructed debut novel.

What could be better than finding a few unmissed millions lying around for the taking? Most writers would agree that one thing better than such a windfall would be publishing their first novel to critical and popular acclaim, making a lucrative sale of the movie rights to the story, and then being offered a contract for a second book. Scott Smith has walked into the woods of book publishing and emerged with just such a prize under his arm.

Like most successful first novels, Smith's achievement is due to a potent combination of hard work, luck, and a flair for the kind of plotting and storytelling that make readers willingly forgo meals and stay up later than they ought to. Smith studied for an MFA in Columbia University's writing program. It was there, in a screenwriting class, that he wrote a scene that became the germ for *A Simple Plan*. "I was interested in film noir; I knew I wanted to write something in that vein, something very dark. I thought of what eventually became chapter six in the book—a series of killings at an isolated farmhouse. It was just an opening to a movie, killings that you see enacted and then covered up. I didn't really know the story around the killings." Smith did not finish the screenplay during the course, and he put the scene away for about a year. He came back to it later when he had decided to write a novel. "I looked at different ideas that I had, and I came back to that scene. I came up with the money and the plane as a way to explain those killings."

The publication of Smith's novel was preceded by the publication of a short story, titled "The Empty House," in *The New Yorker*. His success in placing that story, and the subsequent sale of *A Simple Plan* are due largely to Smith's willingness to cheerfully accept criticism from editors and agents and act on their advice.

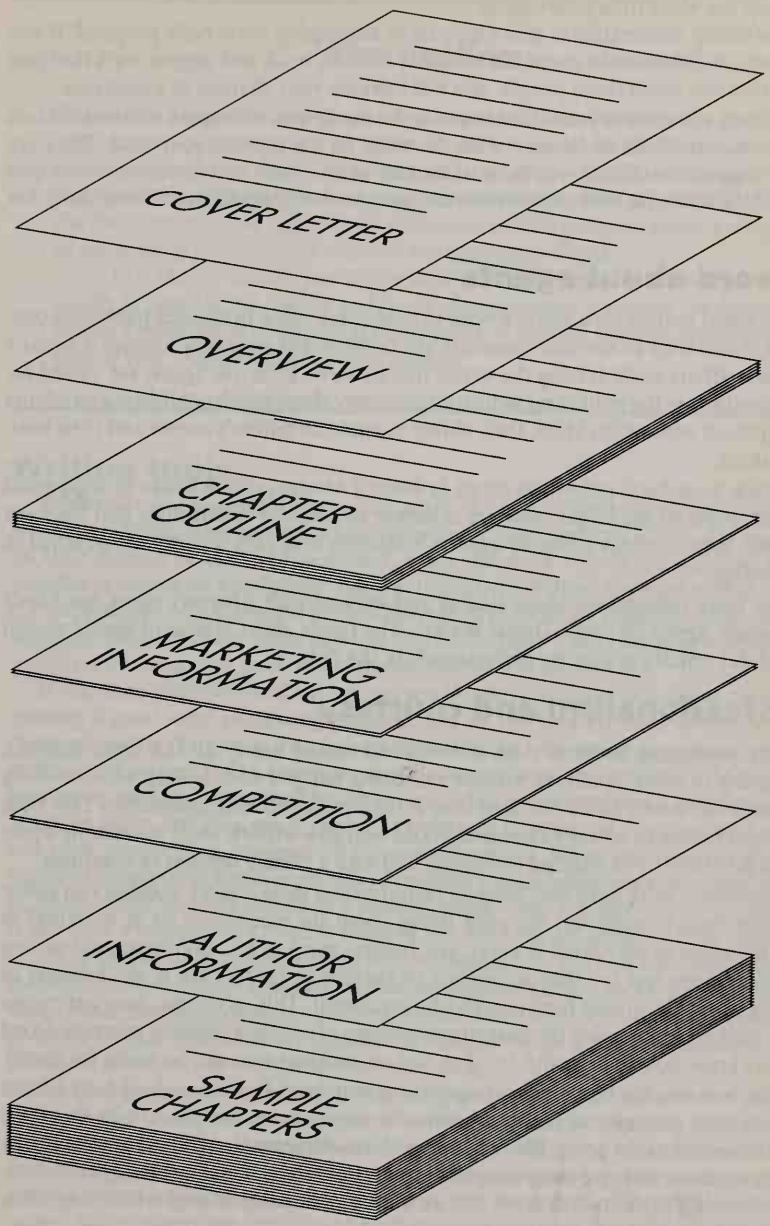
"I had heard of Alice Quinn [fiction editor at *The New Yorker*]; she had taught at Columbia. I hadn't taken her course, but I knew of her. I sent her two stories before the one she published, both without cover letters, just addressed to her. The first one I got a rejection slip back, the second one she wrote a nice note, and the third one she ended up taking." Why no cover letter? "I guess I figured that, since I didn't know her, anything she might assume would be better than the fact that I had just overheard her name." Smith's writing got Quinn's attention, but between the two of them, they edited "The Empty House" for about a year before it was finished.

Smith eventually mentioned to Quinn that he was writing a novel, and she offered to read it. She thought enough of it to pass it along to an agent. The agent had reservations about the book, but agreed to represent it if Smith addressed her concerns. "I spent about three months working on those changes and I sent it back to the agent, at which point she took it and sent it to an editor at Knopf." The editor accepted the manuscript, but with a request for further changes. "She had me continue along the path that my agent had already set me out on." That path involved fleshing out the character of Hank, the protagonist, and making him a more sympathetic character than he had been in early drafts. Smith rewrote the book again from March to October of 1992. It was published in September of 1993.

Smith is now at work on the screenplay adaptation of *A Simple Plan* (film rights were optioned by director Mike Nichols), and his second novel is also underway. Smith's path to publication clearly involved a lot of hard work, but he is the first to admit that good fortune also played a role. "I feel incredibly fortunate—to the point that I keep expecting bad things to happen," he says. "There's a passage in the book where Hank goes through all this stuff that has happened and thinks about his good luck; it gives him a panicky feeling because he thinks something bad is going to happen. Well, that's exactly how I feel."

they have not specified, send as much of the following information as you can.

- The cover or query letter should be a short introduction to the material you include in the proposal.
- An overview is a brief summary of your book. For nonfiction, it should detail your book's subject and give an idea of how that subject will be developed. If you're sending a synopsis of a novel, cover the basic plot.
- An outline covers your book chapter by chapter. The outline should include all major points covered in each chapter. Some outlines are done in traditional outline form, but most are written in paragraph form.
- An author's information sheet should—as succinctly and clearly as possible—acquaint the editor with your writing background and convince her of your qualifications to write about the subject.
- Many editors like to see sample chapters, especially for a first book. In fiction it's



A nonfiction book proposal will usually consist of the elements illustrated above. Their order is less important than the fact that you have addressed each component.

essential. In nonfiction, sample chapters show the editor how well you write and develop the ideas from your outline.

- Marketing information is now expected to accompany every book proposal. If you can provide information about the audience for your book and suggest ways the book publisher can reach those people, you will increase your chances of acceptance.

Editors also want to know what books in the marketplace compete with yours. Look in the *Subject Guide* to *Books in Print* for titles on the topic of your book. They are your competition. Check out those titles and write a one- or two-sentence synopsis describing each. Be sure to mention how your book will be different from the other titles.

A word about agents

An agent represents a writer's work to publishers, often negotiates publishing contracts, follows up to see that contracts are fulfilled and generally handles a writer's business affairs while leaving the writer free to write. Effective agents are valued for their contacts in the publishing industry, their savvy about which publishers and editors to approach with which ideas, their ability to guide an author's career and their business sense.

While most book publishers listed in *Writer's Market* publish books by unagented writers, some of the larger ones are reluctant to consider submissions that have not reached them through a literary agent. Companies with such a policy are so noted in the listings.

For more information about finding and working with a literary agent, see *Guide to Literary Agents* (Writer's Digest Books). The *Guide* offers listings of agents as well as helpful articles written by professionals in the field.

Professionalism and courtesy

The publishing business runs at breakneck speed nearly all the time. Between struggling to meet deadlines without exceeding budgets and dealing with incoming submissions, most editors find that time is their most precious commodity. This state of affairs means an editor's communications with new writers, while necessarily a part of his job, have to be handled efficiently and with a certain amount of bluntness.

But writers work hard too. Shouldn't editors treat them nicely? Shouldn't an editor take the time to point out the *good* things about the manuscript he is rejecting? Is that too much to ask? Well, in a way, yes. It *is* too much to ask. Editors are not writing coaches; much less are they counselors or therapists. Editors are in the business of buying workable writing from people who produce it. This, of course, does not excuse the editor from observing the normal conventions of common business courtesy. Good editors know how to be polite (or they hire an assistant who can be polite for them).

The best way for busy writers to get along with (and flourish among) busy editors is to develop professional business habits. Correspondence and phone calls should be kept short and to the point. Don't hound editors with unwanted calls or letters. Honor all agreements, and give every assignment your best effort. Pleasantness, good humor, honesty and reliability will serve you as well in publishing as they will in any other area of life.

You will occasionally run up against editors and publishers who don't share your standard of business etiquette. It is easy enough to withdraw your submissions from such people and avoid them in the future.

The outline

The outline included in your proposal package should most often be the kind known as a "chapter outline." A "formal outline," the kind with Roman and Arabic numerals and upper and lower case letters that we all learned in high school, may be useful for your own purposes when you sit down to write the book, but the chapter outline will be more effective at quickly giving an editor a sense of the scope of your material and how you plan to develop it.

In a chapter outline, you simply describe in clear prose, as succinctly and lucidly as possible, the content and thrust of each chapter—forgoing the formal outline's hierarchical arrangement of subheads. If you like, you can devote one page of your chapter outline to each chapter.

Writing tools

Typewriters and computers. For many years, *the* tool of the writer's trade was the typewriter. While many writers do continue to produce perfectly acceptable material on their manual or electric typewriters, more and more writers are discovering the benefits of writing on a computer. Editors, too, have benefited from the change; documents produced on a computer are less likely to present to the editor such distractions as typos, eraser marks or globs of white correction fluid. That's because writing composed on a computer is generally corrected before it is printed out.

If you think computers are not for you, you should reconsider. A desktop computer, running a good word processing program, can be the greatest boon to your writing career since the dictionary. For ease of manipulating text, formatting pages and correcting spelling errors, the computer handily outperforms the typewriter. Many word processing programs will count words for you, offer synonyms from a thesaurus, construct an index and give you a choice of typefaces to print out your material. Some will even correct your grammar (if you want them to). When you consider that the personal computer is also a great way of tracking your submissions and staying on top of all the other business details of a writing career—and a handy way to do research if you have a modem—it's hard to imagine how we ever got along without them.

Many people considering working with a computer for the first time are under the mistaken impression that they face an insurmountable learning curve. That's no longer true. While learning computer skills may once have been a daunting undertaking, today's personal computers are specifically designed to be usable by beginners. They are much more user-friendly than they once were.

Whether you're writing on a computer or typewriter, your goal should be to produce pages of clean, error-free copy. Stick to standard typefaces, avoiding such unusual styles as script or italic. Your work should reflect a professional approach and consideration for your reader. If you are printing from a computer, avoid sending material printed from a low-quality dot-matrix printer, with hard-to-read, poorly shaped characters. Many editors are unwilling to read these manuscripts. New dot-matrix and ink jet printers, however, produce "near letter-quality" pages that *are* acceptable to editors. Readability is the key.

Electronic submissions. Many publishers are accepting or even requesting that final

manuscript submissions be made on computer disk. This saves the magazine or book publisher the expense of having your manuscript typeset, and can be helpful in the editing stage. The publisher will simply download your finished manuscript into the computer system they use to produce their product. If a listing in *Writer's Market* specifies "Query for electronic submissions," you should inquire about what computer format they use and how they would like to receive your material. Most will prefer a 3.5" diskette.

Some publishers who accept submissions on disk also will accept electronic submissions by modem. Modems are computer components that can use your phone line to send computerized files to other computers with modems. It is an extremely fast way to get your manuscript to the publisher. You'll need to work out submission information with the editor before you send something via modem.

About electronic submissions

Publishers that accept submissions by disk or modem have this phrase in their listings: Query for electronic submissions. We give the information this way because you'll need to speak with someone before you send anything by these methods. Also, many magazines and publishers change system requirements as equipment and software are updated. Instead of listing information that you may find is outdated when you begin to send the submission, we have put general information in the listing.

Be prepared when you discuss your submission to note the operating system and software you used. Most publishers can work with DOS or Macintosh files, but it will expedite matters to get this clear up front.

Fax machines and boards. We have included publishers' facsimile machine numbers in the listings. Fax machines transmit copy across phone lines. Those publishers who wanted to list their facsimile machine numbers have done so.

Between businesses, the fax has come into standard daily use for materials that have to be sent quickly. In addition, some public fax machines are being installed in airports, hotels, libraries and even grocery stores.

The fax information we have included in listings is not to be used to transmit queries or entire manscripts to editors, unless they specifically request it. Although some machines transmit on regular bond paper, most still use a cheaper grade that is difficult to write on, making it unsuitable for editing. In most cases, this paper also fades with time, an undesirable characteristic for a manuscript. Writers should continue to use traditional means for sending manuscripts and queries and use the fax number we list only when an editor asks to receive correspondence by this method.

Some computer owners also have fax boards installed to allow transmissions to their computer screens or computer printers. Unless the fax board can operate independently from the computer's main processor, an incoming fax forces the user to halt whatever work is in process until the transmission ends. You should never send anything by this method without calling or arranging with the editor for this type of transmission.

Letters and manuscripts sent to an editor for consideration should be presented

in a neat, clean and legible format. That means typed (or computer-printed), double spaced, on 8½ × 11 inch paper. Handwritten materials will most often not be considered at all. The typing paper should be at least 16 lb. bond (20 lb. is preferred). Very thin papers and erasable bond papers are not recommended for manuscripts. Paper with a 25% cotton fiber content will provide a crisp, sharp surface for your typewritten words and will stand up to the frequent handling many manuscripts receive. The first impression an editor has of your work is its appearance on the page. Why take the chance of blowing that impression with a manuscript or letter that's not as appealing as it could be?

You don't need fancy letterhead for your correspondence with editors. Plain bond paper is fine. Just type your name, address, phone number and the date at the top of the page—centered or in the right-hand corner. If you want letterhead, make it as simple and businesslike as possible. Many quick print shops have standard typefaces and can supply letterhead stationery at a relatively low cost. Never use letterhead for typing your manuscripts. Only the first page of queries, cover letters and other correspondence should be typed on letterhead.

Manuscript format

When submitting a manuscript for possible publication, you can increase its chances of making a favorable impression by adhering to some fairly standard matters of physical format. Many professional writers use the format described here. Of course, there are no "rules" about what a manuscript must look like. These are just guidelines—some based on common sense, others more a matter of convention—that are meant to help writers display their work to best advantage. Strive for easy readability in whatever method you choose and adapt your style to your own personal tastes and those of the editors to whom you submit. Complete information on formats for books, articles, scripts, proposals and cover letters, with illustrated examples, is available in *The Writer's Digest Guide to Manuscript Formats*, by Dian Dincin Buchman and Seli Groves (Writer's Digest Books).

Most manuscripts do not use a cover sheet or title page. Use a binder only if you are submitting a play or a television or movie script. Use a paper clip to hold pages together, not staples. This allows editors to separate the pages easily for editing.

The upper corners of the first page of an article manuscript contain important information about you and your manuscript. This information should be single-spaced. In the upper *left* corner list your name, address, phone number and Social Security number (publishers must have this to file accurate payment records with the government). If you are using a pseudonym for your byline, your legal name still must appear in this space. In the upper *right* corner, indicate the approximate word count of the manuscript, the rights you are offering for sale and your copyright notice (© 1995 Patrick Jones). A handwritten copyright symbol is acceptable. [For more information about rights and copyright, see Minding the Details on page 28.] For a book manuscript include the same information with the exception of rights. Do not number the first page of your manuscript.

Center the title in capital letters one-third of the way down the page. Set your typewriter to double-space. Type "by" centered one double-space under your title, and type your name or pseudonym centered one double-space beneath that.

After the title and byline, drop down two double-spaces, paragraph indent, and begin the body of your manuscript. Always double-space your manuscript and use standard paragraph indentations of five spaces. Margins should be about 1½ inches on all sides of each full page of typewritten manuscript.

On every page after the first, type your last name, a dash and the page number in

either the upper left or right corner. The title of your manuscript may, but need not, be typed on this line or beneath it. Page number two would read: Jones—2. Follow this format throughout your manuscript.

If you are submitting novel chapters, leave the top one-third of the first page of each chapter blank before typing the chapter title. Subsequent pages should include the author's last name, the page number, and a shortened form of the book's title: Jones—2—Skating. (In a variation on this, some authors place the title before the name on the left side and put the page number on the right-hand margin.)

When submitting poetry, the poems should be typed single-spaced (double-space between stanzas), one poem per page. For a long poem requiring more than one page, paper clip the pages together. You may want to write "continued" at the bottom of the page, so if the pages are separated, editors, typesetters and proofreaders won't assume your poem ends at the bottom of the first page.

Estimating word count

Many computers will provide you with a word count of your manuscript. Don't be surprised if your editor does another count after editing the manuscript. While your computer is counting characters, an editor or production editor is more concerned with the amount of space the text will occupy on a page. If you have several small headlines, or subheads, for instance, they will be counted the same by your computer as any other word of text. An editor may count them differently to be sure enough space has been estimated for larger type.

For short manuscripts, it's often quickest to count each word on a representative page and multiply by the number of pages. You can get a very rough count by multiplying the number of pages in your manuscript by 250 (the average number of words on a double-spaced typewritten page). Do not count words for a poetry manuscript or put the word count at the top of the manuscript.

To get a more precise count, add the number of characters and spaces in an average line and divide by six for the average words per line. Then count the number of lines of type on a representative page. Multiply the words per line by the lines per page to find out the average number of words per page. Then count the number of manuscript pages (fractions should be counted as fractions, except in book manuscript chapter headings, which are counted as a full page). Multiply the number of pages by the number of words per page you already determined. This will give you the approximate number of words in the manuscript.

Photographs and slides

The availability of good quality photos can be a deciding factor when an editor is considering a manuscript. Many publications also offer additional pay for photos accepted with a manuscript. When submitting black-and-white prints, editors usually want to see 8×10 glossy photos, unless they indicate another preference in the listing. The universally accepted format for transparencies is 35mm; few buyers will look at color prints. Don't send any transparencies or prints with a query; wait until an editor indicates interest in seeing your photos.

On all your photos and slides, you should stamp or print your copyright notice and "Return to:" followed by your name, address and phone number. Rubber stamps are preferred for labeling photos since they are less likely to cause damage. You can order them from many stationery or office supply stores. If you use a pen to write this information on the back of your photos, be careful not to damage the print by pressing too hard or by allowing ink to bleed through the paper. A felt tip pen is best, but you should take care not to put photos or copy together before the ink dries.

Captions can be typed on a sheet of paper and taped to the back of the prints. Some writers, when submitting several transparencies or photos, number the photos and type captions (numbered accordingly) on a separate 8½ × 11 sheet of paper.

Submit prints rather than negatives or consider having duplicates made of your slides or transparencies. Don't risk having your original negative or slide lost or damaged when you submit it.

Photocopies

Make copies of your manuscripts and correspondence before putting them in the mail. Don't learn the hard way, as many writers have, that manuscripts get lost in the mail and that publishers sometimes go out of business without returning submissions. You might want to make several copies of your manuscript while it is still clean. Some writers keep their original manuscript as a file copy and submit good quality photocopies.

Some writers include a self-addressed postcard with a photocopied submission and suggest in the cover letter that if the editor is not interested in the manuscript, it may be tossed out and a reply returned on the postcard. This practice is recommended when dealing with international markets. If you find that your personal computer generates copies more cheaply than you can pay to have them returned, you might choose to send disposable manuscripts. Submitting a disposable manuscript costs the writer some photocopy or computer printer expense, but it can save on large postage bills.

Mailing submissions

No matter what size manuscript you're mailing, always include sufficient return postage and a self-addressed envelope large enough to contain your manuscript if it is returned.

A manuscript of fewer than six pages may be folded in thirds and mailed as if it were a letter using a #10 (business-size) envelope. The enclosed SASE can be a #10 folded in thirds or a #9 envelope which will slip into the mailing envelope without being folded. Some editors also appreciate the convenience of having a manuscript folded into halves in a 6 × 9 envelope.

For manuscripts of six pages or longer, use 9 × 12 envelopes for both mailing and return. The return SASE may be folded in half.

A book manuscript should be mailed in a sturdy, well-wrapped box. Enclose a self-addressed mailing label and paper clip your return postage stamps or International Reply Coupons to the label.

Always mail photos and slides First Class. The rougher handling received by Fourth Class mail could damage them. If you are concerned about losing prints or slides, send them certified or registered mail. For any photo submission that is mailed separately from a manuscript, enclose a short cover letter of explanation, separate self-addressed label, adequate return postage and an envelope. Never submit photos or slides mounted in glass.

To mail up to 20 prints, you can buy photo mailers that are stamped "Photos—Do Not Bend" and contain two cardboard inserts to sandwich your prints. Or use a 9 × 12 manila envelope, write "Photos—Do Not Bend" and make your own cardboard inserts. Some photography supply shops also carry heavy cardboard envelopes that are reusable.

When mailing a number of prints, say 25-50 for a book with illustrations, pack them in a sturdy cardboard box. A box for typing paper or photo paper is an adequate mailer. If, after packing both manuscript and photos, there's empty space in the box,

INSIDER REPORT

Making it as a fulltime freelancer

"When my friends who are writers say they're hesitant to send their ideas to national publications, I always want to ask them, 'What are you waiting for?' " says freelance writer Kathleen Heins. "When I send a proposal off and it comes back, I just turn around and send it to the next person on the list. That way I make a negative into a positive." Rejection, she says, is part of the business of writing.

This attitude has served Heins well. Her work has been published in numerous national, regional and local publications, including *USA Weekend*, *New Woman*, *American Health* and *Runner's World*. In 1982 she sold her first piece to a suburban New York publication, one of a group of magazines called Spotlight Publications.

Kathleen M. Heins

"At the time I didn't know what 'on spec' meant, but since I was unpublished, I told the editor the idea for a story I had in mind and said if she didn't like it, she didn't have to pay me. I remember her asking what made me think I was a writer. I told her I had always had a compulsion to write and had been doing so since I was a teenager. I really don't think you need to be published to be considered a writer. It was a hard sell, but she agreed."

A few days after her conversation with the editor, Heins got a call. "I hadn't even finished the article, my 'test,' when the editor called and asked me to put it on hold and write something else she needed right away. From then on she kept me as busy as I wanted to be. I didn't get paid much but I didn't care. I was thrilled to see my name in print and I was building a great portfolio and clips file. As soon as I had three clips from her I used them to take off."

Heins has been writing and publishing ever since, switching to a fulltime freelance career a few years ago. Yet, she warns writers, it can be a difficult move. "I don't recommend fulltime freelancing unless you have a list of steady clients that you know are going to pay you regularly. Even after I decided to go fulltime, I ended up working about 20 hours a week writing and producing material for a television newsroom to supplement my freelance income for a while."

One way Heins keeps the work coming in is by being open to a variety of writing assignments. In addition to articles for consumer and trade publications on both a local and national level, she also writes for newspapers, businesses and hospitals. In fact, her specialties are health, fitness and medicine.

Heins found her writing niche after she started writing for *American Health*

magazine. She had also worked for a time in hospital public relations. "I think if you become known for writing about certain subjects, you have a better chance of getting those assignments than other people. One thing I recommend to writers interested in developing a specialty is to find ways to enhance their marketability. For example, I recently took a course in medical terminology and also became licensed as an emergency medical technician. Look for ways to stand above the competition."

Asked if there was a danger of getting "pegged" or locked into writing only about certain subjects, Heins says she hasn't had much trouble with it. She says writing about health and fitness keeps her busy and she's comfortable with it. "I have done some nutrition and some relationship pieces which are not my specialty, so I don't think having a specialty has kept me from working in other areas. I think what really speaks for you anyway is your writing credits."

Because Heins is the mother of a toddler, she says making time to write is a juggling act. "I usually try to wake up a few hours before my daughter does and use that time for writing and organizing for the day. That way I'm free to spend most of the day with her. In the afternoon I may have a teenager come over to babysit while I do interviews or research. Then, after my daughter goes to sleep for the night, I do some more writing."

A new laptop computer will make things easier, says Heins, who plans to write while her daughter is playing outside or finger painting at the kitchen table. She advises all serious freelancers to invest in a computer—most editors ask if she has an IBM compatible. A fax machine is also becoming an essential. "Editors don't ask if you have access to a fax anymore. Now they just ask 'What's your fax number?'

"I also think every writer should have a portfolio. When you send an editor your bio and clips you can offer to stop by and show a portfolio. It gives you an in and gives the editor an opportunity to get to know you in person."

Keeping up with paper work is a necessity when operating a freelance business, although, Heins admits, it's not her favorite part. She tries to set aside time each week to write invoices, make queries and search for possible reprint markets. "I really hate to do phone expenses, but that's one thing you have to keep track of. Not all your calls are going to be your sources. Sometimes you make a call that leads to a source and it's easy to forget that one. I've started recording all my long distance calls and who I made them to on a special calendar just for phone expenses."

Heins writes two to three major pieces a month. "Although I do look through newspapers to get ideas from their features, I find I have the best luck drawing on my personal experiences or those of my friends and family." As far as the actual writing goes, she may edit a piece dozens of times before she has a final draft.

"If a piece isn't going the way you'd like," she advises, "get all the basics down so you at least have a skeleton of the article and then do something else for awhile. Sometimes a short break is all you need to get your writing back in gear. At the same time you should also act on moments of inspiration even if they don't come at the most convenient times. Sometimes I do my best work while the rest of the neighborhood is asleep."

slip in enough cardboard inserts to fill the box. Wrap the box securely.

To mail transparencies, first slip them into protective vinyl sleeves, then mail as you would prints. If you're mailing a number of sheets, use a cardboard box as for photos.

Types of mail service

- First Class is the most expensive way to mail a manuscript, but many writers prefer it. First Class mail generally receives better handling and is delivered more quickly. Mail sent First Class is also forwarded for one year if the addressee has moved, and is returned automatically if it is undeliverable.
- Fourth Class rates are available for packages, but be sure to pack your materials carefully because they will be handled roughly. To make sure your package will be returned to you if it is undeliverable, print "Return Postage Guaranteed" under your address.
- Certified Mail must be signed for when it reaches its destination. If requested, a signed receipt is returned to the sender. There is a $1 charge for this service, in addition to the required postage, and a $1 charge for a return receipt.
- Registered Mail is a high-security method of mailing. The package is signed in and out of every office it passes through, and a receipt is returned to the sender when the package reaches its destination. This service begins at $4.40 in addition to the postage required for the item. If you obtain insurance for the package, the cost begins at $4.50.
- United Parcel Service may be slightly cheaper than First Class postage if you drop the package off at UPS yourself. UPS cannot legally carry First Class mail, so your cover letter needs to be mailed separately. Check with UPS in your area for current rates. The cost depends on the weight of your package and the distance to its destination.
- If you're in a hurry to get your material to your editor, you have a lot of choices these days. In addition to fax and modem technologies mentioned earlier, overnight and two-day mail services are provided by both the U.S. Postal Service and several private firms. More information on next day service is available from the U.S. Post Office in your area, or check your Yellow Pages under "Delivery Services."

Other correspondence details

Use money orders if you are ordering sample copies or supplies and do not have checking services. You'll have a receipt, and money orders are traceable. Money orders for up to $35 can be purchased from the U.S. Postal Service for a 75¢ service charge; the cost is $1 for a maximum $700 order. Banks, savings and loans, and some commercial businesses also carry money orders; their fees vary. *Never* send cash through the mail for sample copies.

Insurance is available for items handled by the U.S. Postal Service but is payable only on typing fees or the tangible value of the item in the package—such as typing paper—so your best insurance when mailing manuscripts is to keep a copy of what you send. Insurance is 75¢ for $50 or less and goes up to a $5 maximum charge.

When corresponding with publications and publishers in other countries, International Reply Coupons (IRCs) must be used for return postage. Surface rates in other countries differ from those in the U.S., and U.S. postage stamps are of use only within the U.S. Currently, one IRC costs 95¢ and is sufficient for one ounce traveling at surface rate; two must be used for airmail return. Canadian writers pay $1.50 for an IRC.

Because some post offices don't carry IRCs (or because of the added expense), many writers dealing with international mail send photocopies and tell the publisher

to dispose of them if the manuscript is not appropriate. When you use this method, it's best to set a deadline for withdrawing your manuscript from consideration, so you can market it elsewhere.

International money orders are also available from the post office for a $3 charge. See U.S. and Canadian Postage by the Page on the inside covers for specific mailing costs. All charges were current at press time but are subject to change during the year.

Recording submissions

Once you've begun submitting manuscripts, you'll need to manage your writing business by keeping copies of all manuscripts and correspondence, and by recording the dates of submissions.

One way to keep track of your manuscripts is to use a record of submissions that includes the date sent, title, market, editor and enclosures (such as photos). You should also note the date of the editor's response, any rewrites that were done, and, if the manuscript was accepted, the publication date and payment information. You might want to keep a similar record just for queries.

Also remember to keep a separate file for each manuscript or idea along with its list of potential markets. You may want to keep track of expected reporting times on a calendar, too. Then you'll know if a market has been slow to respond and you can follow up on your query or submission. It will also also provide you with a detailed look at your sales over time.

Current Trends in Publishing

by Kirsten Holm

Book publishing

Trade book publishing has been undergoing massive changes. Houses being bought, editors leaving, imprints closing, company names changing (and changing back!) all paint a picture of an industry in flux, but, as the numbers show, not in crisis. Last year trade book sales were up 7.2% overall, although some in the industry feel that is due more to higher prices than to increased numbers of books sold. Adult hardcover and juvenile paperback sales, up 14.9% and 15.7% respectively, carried adult paperbacks, up only 1.7%, and compensated for the 8% drop in juvenile hardcover. The Commerce Department predicted an 8.5% sales increase for 1994, and forsaw the addition of 1,000 jobs, primarily in the editorial, marketing and administrative areas.

It's important to note that most of the cutbacks and closures have been in the trade book sector, which accounts for approximately 25% of the industry. Professional, scholarly and academic publishing remain relatively unaffected. In fact, the elhi and professional segments increased in 1993 by 10.9% and 9.5%, respectively.

Within the large conglomerate publishers that control much of the marketplace, expectations of profit and return on investments are higher than ever. Seven companies accounted for over 80% of the bestseller entries last year. Publishing executives place increasing emphasis on marketability, and with so much money at stake are less willing to take chances. Publishers must have a sense of marketing, finance and media relations in addition to an idea of what makes a good read. While the larger houses are still interested in first novels, this bottom-line awareness often means that it is extremely difficult to do a second or third book if the previous efforts didn't meet financial expectations.

The emerging small press

Recent acquisitions and mergers have created seven giant communications conglomerates at the expense of the moderate to large size publishers. While the large New York publishing concerns are restructuring, scaling back and generally becoming more conservative, small independent and university presses have stepped up to the plate. The small press is responsible for books existing that otherwise might not be published and provide avenues for midlist and new authors to reach their audiences. As larger publishing houses in New York have gotten bigger, small presses have developed strong grass roots. A few nonprofit literary presses are now paying modest advances and marketing on a national level, with impressive results. Many small presses report their best year ever. *New York Newsday* has even launched a column devoted to reviewing hardcover fiction from small and independent presses. Some of the larger small presses may be poised to move up in size in the coming years.

Electronic publishing

A current topic at many conferences and seminars is electronic publishing. This can take the form of books on disk or may encompass video and computer technology in an interactive or multimedia format. Currently, books on disk lend themselves more

readily to reference works or computer-related topics. Many in the industry see the strongest competition for potential readers' attention coming not from other publishers but from entertainment companies. Multimedia or interactive products feature the intertwining of computer and television or video technologies with traditional publishing content. This leads to alliances such as Random House and Broderbund or Simon & Schuster and Davidson & Associates to jointly develop, publish and distribute multimedia products for the consumer, education, business and reference markets. See the *Insider Report* featuring Kirby Timmons of CRM Films in the Scriptwriting section for a discussion of multimedia and its uses.

An issue of especial concern for writers in this area is electronic rights. The Author's Guild, American Society of Journalists and Authors, National Writers Union and Assocation of Authors Representatives have all published position papers outlining suggested guidelines. The NWU and Author's Guild/ASJA papers call for a revision of standard royalty rates and new definitions of "out of print" in a medium that can print on demand. The Author's Guild/ASJA also would bar the use of a work without the author's approval of media, form and content, and recommends that where rights are licensed from another party, such as the print publisher, the licensor be compensated on the traditional basis of a literary agent's commission, with the writer receiving 85-90%. The controversy over Random House's boilerplate contract language that assigns rights to the publisher for media "yet to be invented" has yet to be resolved.

More and more, successful book publishing is a combination of good marketing and good content. One way to put yourself above the crowd is to stay abreast of what types of books are popular now. We will be focusing primarily on nonfiction; for a more thorough discussion of directions in fiction, see "Commercial Fiction Trends Report" in *Novel & Short Story Writer's Market*.

Nonfiction currents

It is difficult to say "This is out. This is in." There will always be exceptions. In general, our listings report that hot topics currently include health care, multicultural issues, gift books and aging. Topics that may have peaked are recovery, biography and cookbooks. However, the success of the self-help books of Susan Powter, or the "Oprah cookbook" of Rosie O'Daley, testify to the powerful marketing tools of infommercials and personal TV appearances on a popular talk show.

Due in part, perhaps, to the continuing growth of superstores and their need to fill the increased shelf space, there is a strong movement to identify small niche markets and create titles to meet their needs. In the area of business, the "Great Jobs" series for English, Foreign Language, History and Psychology majors exists alongside the "Careers for" series, which includes animal lovers, film buffs, and kids at heart. Résumé books and career guides continue to sell, with specialization, as evidenced by such titles as *Electronic Résumé Revolution*, *The Minority Career Guide* and *The Smart Woman's Guide to Interviewing and Salary Negotiation*.

Baby boomers

Another popular wave introduces a mixture of self-help, recovery, religion and Eastern philosophy known generally as "spirituality." The works of Thomas Moore, Marianne Williamson, Lawrence Kushner and others deal with different facets of the search for meaning, a topic that seems to resonate with many baby boomers. New titles include women's spiritual issues, overcoming addictions, personal growth, and general care and feeding of the soul. Other popular related areas are examining and developing values, the "kindness movement" and inspiration/affirmation books.

Angels continue to do well, with an "Oprah" show and NBC specials fueling demand for books on this topic.

Physical health, as well as spiritual health, is also a popular subject. Baby boomers again form the core buyers of diet, health and fitness books, but now these books focus on personal choices and abilities to effect change. The popularity of Deepak Chopra, Susan Powter and the myriad of low-fat high-taste cookbooks testify to current concerns in making healthy lifestyle choices and the connection between the mind, body and spirit.

The subjects of women's issues and women's studies is also a strong trend. The number of feminist bookstores increased 27% over last year, despite competition from larger chain stores and a weak economy. The market for gay and lesbian fiction and nonfiction continues to grow as well, largely through small presses. Some credit the gay/lesbian rights ballot initiatives with sparking more activity and interest in the community as a whole.

. . . and the baby boomlet

Children's books have not enjoyed the same level of growth as in recent years. Juvenile hardcover sales are down, but juvenile paperbacks are doing well. This may be due to the fact that the children of baby boomers are reaching adolescence, when reading is often replaced with other activities. *Publishers Weekly* reports that of the 48 frontlist juvenile hardcovers that sold more than 75,000 copies last year, ten were connected to movies and another ten were based on TV shows. Middle-grade horror continues to run strongly, with R.L. Stine and Christopher Pike heading the list, and series such as the Babysitters Club and Sweet Valley High also remain popular.

Computer products for children, however, are exploding, with sales of educational software growing 77% in the first six months of 1993, faster than any other category. Since many schools feature computer classes and up to a third of American households include a child who uses the PC for schoolwork, school-age children are computer-literate and media-savvy. Publishers are forging alliances to enter this potentially lucrative market. Multilingual interactive storybooks on CD-ROM with accompanying book have been created jointly by Random House and Broderbund, for example. From Sesame Street on CD-ROM to electronic math and science textbooks, publishers and software companies alike recognize the great potential that exists in this market.

The largest growth in U.S. population is coming not from births but from immigration. Hispanic and Asian populations are growing, and are often ill-served by traditional books. Multicultural approaches in social studies curricula, combined with the whole language approach to reading, increases the need for children's works that encompass and embrace different peoples and cultures.

The cross-pollination of trends continues unabated. Women's issues and spirituality? Marianne Williamson's *Measure of a Woman*. Business and self-help? *Superself*, by Charles Givens. Low-fat cooking and multimedia? *Betty Crocker's New Choices*. It seems there are any number of combinations and permutations of current trends. To differentiate your proposal from what has already been published and others being suggested, you must be able to show a prospective publisher why *your* book is special.

Gathering market information

Many of the publishers this year have stressed inclusion of marketing information in book proposals. How many other books are being published on this topic? What makes your take on the subject different (and better) than these others? Who *will* buy (not who *ought* to buy) this book? Publishers must answer these questions before they

offer you a contract. By answering these questions for them upfront you give yourself an edge. But this edge takes research.

To keep up with trends in book publishing you can turn to several sources. One invaluable reference is your local bookseller, who is keenly aware of which subjects are running hot or cold. *Publishers Weekly*, *Library Journal* and *The American Bookseller* feature up-to-date news on publishing and bookselling, as well as chart book sales and trends. *Book Industry Trends* published by the Book Industry Study Group predicts how the industry will perform in the years ahead. Almost all writers' organizations offer newsletters with markets information. Check into the writers' organizations in your area, or contact national groups such as the National Writers' Association which have regional chapters. These all can offer invaluable market direction insights that help present your book proposal in its most favorable light.

Consumer magazines

The magazine market is definitely looking up. After several years of downturn, ad revenues are up and ad pages are increasing. While newsstand sales are down for a variety of reasons, subscription circulation is increasing.

Last year was a record year for consumer magazine startups, 789 as opposed to 679 for the previous year, according to *Samir Husni's Guide to New Consumer Magazines*. Forecasts predicted fewer acquisitions of established magazines and increased start-ups for 1994. The life expectancy of these magazines, however, is a consideration. Half of all new magazines will be operating after one year, and only three out of ten will be in business after four years. All in all, though, the consumer magazine market is the best it has been in 13 years.

Many magazines listed in *Writer's Market* this year have increased the number of issues per year, and we've been happily surprised by the large number of magazines that, after an absence of a year or two, have asked to be listed again. Business is better in most categories, with the possible exception of juvenile magazines, which report a drop in subscriptions.

Most of the trends we will be examining are specific to the consumer magazine market. For more information on trade journals see the introduction to that section. Trade journals tend to be more stable and less susceptible to trends, since they exist to serve a specific industry or profession. While there may be less prestige in the trade and professional market, it is definitely a way to build your portfolio of clips and perhaps a career. Many writers with a particular professional expertise parlay that knowledge into a successful career writing for trade magazines, as in the case of Linda Leake, a featured *Insider Report* in the Trade Journal section.

The future is now

Just as electronic publishing is a hot topic in book publishing circles, electronic media is the new wave in magazines as well. Many major magazine companies, including Time Inc., Hearst, Condé Nast and Times Mirror are establishing divisions and executive positions to deal with multimedia development. The lure of capturing new markets with the treasure trove of content these companies possess is compelling.

Some companies are developing programs for niche cable markets based on the content of their magazines. Times Mirror, for example, is planning the Outdoor Life Channel, a 24-hour network that will draw on outdoor and sporting titles such as *Outdoor Life*, *Salt Water Sportsman*, *Field & Stream* and *Yachting*.

Most entering this arena, however, are eyeing online services and CD-ROM as the most potentially lucrative area. A few magazine groups are launching their own online services. Ziff-Davis planned to launch the Interchange Online Network (ION) in the

fall of 1994, drawing on content from their many computer magazines even though ZiffNet is currently found on CompuServe. Although initially directed towards computer professionals, plans are for the new service to expand and cover various general consumer subjects as well. Other magazines, such as *Writer's Digest*, *Spin*, *Atlantic Monthly* and *Kiplinger's Personal Finance* are participating in already existing services such as eWorld, America Online and Prodigy.

Other magazines are exploring the potential of CD-ROM technology. One major newsmagazine has already produced several quarterly CD-ROM issues, incorporating multimedia elements not included in the print version. *Money Magazine* has produced "Money in the 90s," a compilation of monthly issues from January 1990 to December 1993, which includes full-motion video and full-text search capabilities.

And some companies are combining all these into one package. Hearst plans to launch HomeNet in late 1994, an interactive multimedia online, television and CD-ROM service that will draw on the content of their many magazines, such as *Good Housekeeping* and *Popular Mechanics*, as well as Hearst books, newspapers and television programming. HomeNet will treat every aspect of the home, from design, construction and decorating to maintenance, repair and gardening.

While these magazines and others have already started down the electronic path, many more companies are hanging back watchfully, ready to jump in when they feel the time is right.

Keeping up with the trends

Thirty-one computer magazines debuted last year, a testament to the exciting changes ahead in this industry. In the annual *Folio:500* review, of the top 100 magazines by revenue 12 were computer titles, more than any other category, and computer-oriented magazines comprised the top 5 in volume of advertising pages. While many of the new magazines are aimed primarily at readers with technical backgrounds, quite a few target the consumer audience. There is even a new interactive CD-ROM magazine about the people, politics and issues surrounding creation and production of CD-ROM products.

Health and fitness is a hot topic, with an emphasis on holistic well-being and strength. A number of new magazines have been created to fit the needs of specific demographic groups. The health needs of men, women, African-American women and children, among others, are the focus of magazines that debuted this past year. *TravelFit*, for example, focuses on fitness while on the road. This trend is complimented by an emphasis on natural foods, healthy cooking and added interest in vegetarianism. *Eating Well* grew 30% in circulation last year, and 28% in advertising pages.

Baby boomers' muscle is felt in consumer magazines as well. The interests of this age group are reflected in personal finance, lifestyle and travel offerings, among others. Magazines such as *Kiplinger's Personal Finance* (formerly *Changing Times*), *Family Life* and *Condé Nast Traveler* serve affluent middle-aged Americans, answering their needs with a service edge. These publications provide information and knowledge to an upscale audience who may not be interested in the least expensive options, but rather the *smartest* way to spend money.

Magazines emphasizing child care and parental guidance are doing well, with new publications such as the self-explanatory *Biracial Child* and *Divorced Parents X-Change* aimed at individuals whose particular concerns are addressed in their own forum. Magazines for children themselves are suffering a drop in circulation, which parallels the downturn in juvenile hardcover books. On the other hand, a corollary to the increased sales in middle grade paperbacks is an upsurge of glossy magazines aimed at the teenage market.

Know your markets

With magazines starting up and shutting down so rapidly, it's important for writers to stay on top of changes not only in the industry but also in the specific markets they target. Libraries, bookstores and newsstands are good sources for field research. Trade magazines such as *Folio*, *Advertising Age* and *Writer's Digest* offer information and analysis of trends in subject matter as well as the economics of advertising and circulation.

Perhaps the most important step in building a career in magazine writing is magazine reading. Check your local library's holdings or order a few sample copies for a market in which you are particularly interested. Peruse a few issues to get the flavor and perspective of a magazine, and gather a list of article ideas they might be interested in. Request a copy of the writer's guidelines and editorial calendar. Study the listing information closely and construct your query letter with care. Make your query letter impress the editor with your knowledge of the magazine and understanding of its editorial mission. Presenting an editor with well-written, appropriately targeted material is the unchanging key to success in this changeable business.

The Business of Writing

Minding the Details

Writers who have had some success in placing their work know that the effort to publish requires an entirely different set of skills than does the act of writing. Whether it's a question of left brain vs. right brain or art vs. commerce, a definite shift in perspective is required when you move from creating your work to selling it. Like it or not, successful writers—*career* writers—have to keep the business side of the writing business in mind as they work.

Each of the following sections discusses a writing business topic that affects anyone selling his writing. We'll take a look at contracts and agreements—the documents that license a publisher to use your work. We'll consider your rights as a writer and sort out some potentially confusing terminology. We'll cover the basics of copyright protection—a topic of perennial concern for writers. And for those of you who are already making money with your writing, we'll offer some tips for keeping track of financial matters and staying on top of your tax liabilities.

Our treatment of the business topics that follow is necessarily limited. Look for complete information on each subject at your local bookstore or library—both in books (some of which are mentioned below) and periodicals aimed at writers. Information is also available from the federal government, as indicated later in this article.

Contracts and agreements

If you've been freelancing even a short time, you know that contracts and agreements vary considerably from one publisher to another. Some magazine editors work only by verbal agreement; others have elaborate documents you must sign in triplicate and return before you begin the assignment. As you evaluate any contract or agreement, consider carefully what you stand to gain and lose by signing. Did you have another sale in mind that selling all rights the first time will negate? Does the agreement provide the publisher with a number of add-ons (advertising rights, reprint rights, etc.) for which they won't have to pay you again?

In contract negotiations, the writer is usually interested in licensing the work for a particular use but limiting the publisher's ability to make other uses of the work in the future. It's in the publisher's best interest, however, to secure rights to use the work in as many ways as possible, both now and later on. Those are the basic positions of each party. The negotiation is a process of compromise and capitulation on questions relating to those basic points—and the amount of compensation to be given the writer for his work.

A contract is rarely a take-it-or-leave-it proposition. If an editor tells you that his

company will allow *no* changes on the contract, you will then have to decide how important the assignment is to you. But most editors are open to negotiation, and you should learn to compromise on points that don't matter to you while maintaining your stand on things that do.

When it's not specified, most writers assume that a magazine publisher is buying one-time rights. Some writers' groups can supply you with a sample magazine contract to use when the publisher doesn't supply one, so you can document your agreement in writing. Members of The Authors Guild are given a sample book contract and information about negotiating when they join. For more information about contracts and agreements, see *Business and Legal Forms for Authors & Self-Publishers*, by Tad Crawford (Allworth Press, 1990); *From Printout to Published*, by Michael Seidman (Carroll & Graf, 1992) or *The Writer's Guide to Contract Negotiations*, by Richard Balkin (Writer's Digest Books, 1985), which is out of print but should be available in libraries.

Rights and the writer

A creative work can be used in many different ways. As the originator of written works, you enjoy full control over how those works are used; you are in charge of the rights that your creative works are "born" with. When you agree to have your work published, you are giving the publisher the right to use your work in one or more ways. Whether that right is simply to publish the work for the first time in a periodical or to publish it as many times as he likes and in whatever form he likes is up to you—it all depends on the terms of the contract or agreement the two of you arrive at. As a general rule, the more rights you license away, the less control you have over your work and the more money you should be paid for the license. We find that writers and editors sometimes define rights in different ways. For a classification of terms, read Types of Rights, below.

Sometimes editors don't take the time to specify the rights they are buying. If you sense that an editor is interested in getting stories but doesn't seem to know what his and the writer's responsibilities are regarding rights, be wary. In such a case, you'll want to explain what rights you're offering (preferably one-time or first serial rights only) and that you expect additional payment for subsequent use of your work.

You should strive to keep as many rights to your work as you can from the outset, otherwise, your attempts to resell your writing may be seriously hampered.

The Copyright Law that went into effect January 1, 1978, said writers were primarily selling one-time rights to their work unless they—and the publisher—agreed otherwise in writing. Book rights are covered fully by the contract between the writer and the book publisher.

Types of rights

- First Serial Rights—First serial rights means the writer offers the newspaper or magazine the right to publish the article, story or poem for the first time in any periodical. All other rights to the material belong to the writer. The qualifier "North American" is often added to this phrase to specify a geographical limit to the license.

When material is excerpted from a book scheduled to be published and it appears in a magazine or newspaper prior to book publication, this is also called first serial rights.

- One-Time Rights—A periodical that licenses one-time rights to a work (also known as simultaneous rights) buys the *nonexclusive* right to publish the work once. That is, there is nothing to stop the author from selling the work to other publications at the same time. Simultaneous sales would typically be to periodicals without overlapping

INSIDER REPORT

Nonfiction publisher looks for authors who can solve problems

Bob Adams, Inc., is known as a successful publisher of how-to and self-help titles. Brandon Toropov, vice president of editorial, says the thing that distinguishes Bob Adams titles is that they solve problems for readers—whether the problem is selling your home, writing your own wedding vows or finding a job in Phoenix. "The ideal author, for us, is not necessarily somebody who's been published before," says Toropov, "but it does need to be somebody who has a solution to a problem. Obviously there are a lot of other types of publishing where that's not the issue, but for the types of books I acquire, that's one of the big yardsticks."

In addition to the problem-solving angle, Toropov has strong feelings about how writers can improve their chances of constructing a proposal that will make it past the first cut. "The thing I'm looking for is someone who, in the first paragraph of the cover letter, can prove that they've got both a hook and a compelling way of expressing that hook. The author's experience or background should support the hook they've established, and they should have some writing skills." One of the first indications of a writer's facility with words (or lack of it) is the cover letter, Toropov says. "One of the ways I answer the question of whether or not a person can write is to see how they handle their first encounter with a reader, which is me. If they take forever to get to the point in the cover letter or give me a lot of information that doesn't have anything to do with the book, that's an indication that they're probably going to treat other readers after me the same way."

Toropov makes the point that, in their proposals, writers should attempt to focus on the publisher's perspective; that means taking the time to study the market for your book and realistically assessing your book's chances. "I can't tell you the number of times I've seen bits of market research done by authors in which they'll say, 'There's *absolutely* no book out there that does this type of thing!' That tends to sound a little flat after a while; you just don't believe it when you read it anymore. What's more persuasive is a line by line analysis of the whole category, what's been done recently, what's hit a bestseller list and for how long, that kind of thing. The question we've got to answer is, 'What are retailers, for better or for worse, going to compare this to?' " Toropov says the fact that nothing's been published on your topic before is not necessarily a good sign. "Actually," he says, "that kind of short-circuits the proposal because, even if it's true (which I tend to doubt), that means there's nothing to compare it to in the marketplace. It might also mean that there is no market for it."

The preferred first submission to Bob Adams, Inc., is a brief cover letter and a two-page query. Toropov warns against a tendency to send too much material

in your initial submission. Writers tend to think there's less chance to gain someone's attention with a small package, but actually, according to Toropov, it works just the opposite. "I'm much more likely to look through a brief, compelling summary in two or three pages than I am to wade through an entire manuscript."

audiences.

- Second Serial (Reprint) Rights—This gives a newspaper or magazine the opportunity to print an article, poem or story after it has already appeared in another newspaper or magazine. Second serial rights are nonexclusive—that is, they can be licensed to more than one market.
- All Rights—This is just what it sounds like. If you license away all rights to your work, you forfeit the right to ever use it again.

If you think you want to use the material later, you must avoid submitting to such markets or refuse payment and withdraw your material. Ask the editor whether he is willing to buy first rights instead of all rights before you agree to an assignment or sale. Some editors will reassign rights to a writer after a given period, such as one year. It's worth an inquiry in writing.

- Subsidiary Rights—These are the rights, other than book publication rights, that should be covered in a book contract. These may include various serial rights; movie, television, audiotape and other electronic rights; translation rights, etc. The book contract should specify who controls these rights (author or publisher) and what percentage of sales from the licensing of these sub rights goes to the author. Remember, though, that just because a publishing company wants control of all sub rights does not mean they are actually going to use them. If you think you or your agent would be more effective at seeking out subsidiary uses of your work, you should strive to retain as many of these rights as your can.
- Dramatic, Television and Motion Picture Rights—This means the writer is selling his material for use on the stage, in television or in the movies. Often a one-year option to buy such rights is offered (generally for 10% of the total price). The interested party then tries to sell the idea to other people—actors, directors, studios or television networks, etc. Some properties are optioned over and over again, but most fail to become dramatic productions. In such cases, the writer can sell his rights again and again—as long as there is interest in the material. Though dramatic, TV and motion picture rights are more important to the fiction writer than the nonfiction writer, producers today are increasingly interested in nonfiction material; many biographies, topical books and true stories are being dramatized.

Copyright

Copyright law exists to protect creators of original works. It is engineered to encourage creative expression and aid in the progress of the arts and sciences by ensuring that artists and authors hold the rights by which they can profit from their labors.

Copyright protects your writing, unequivocally recognizes you (its creator) as its owner, and grants you all the rights, benefits and privileges that come with ownership. The moment you finish a piece of writing—whether it is a short story, article, novel or poem—the law recognizes that only you can decide how it is to be used.

The basics of copyright law are discussed here. More detailed information can be obtained from the Copyright Office and in the books mentioned at the end of this section.

Copyright law gives you the right to make and distribute copies of your written works, the right to prepare derivative works (dramatizations, translations, musical arrangements, etc.—any work based on the original) and the right to perform or publicly display your work. With very few exceptions, anything you write today will enjoy copyright protection for your lifetime plus 50 years. Copyright protects "original works of authorship" that are fixed in a tangible form of expression. Titles, ideas and facts can *not* be copyrighted.

Some people are under the mistaken impression that copyright is something they have to send away for, and that their writing is not properly protected until they have "received" their copyright from the government. The fact is, you don't have to register your work with the Copyright Office in order for your work to be copyrighted; any piece of writing is copyrighted the moment it is put to paper. Registration of your work does, however, offer some additional protection (specifically, the possibility of recovering punitive damages in an infringement suit) as well as legal proof of the date of copyright.

Registration is a matter of filling out a form (for writers, that's generally form TX) and sending the completed form, a copy of the work in question and a check for $20 to the Register of Copyrights, Library of Congress, Washington DC 20559. If the thought of paying $20 each to register every piece you write does not appeal to you, you can cut costs by registering a group of your works with one form, under one title for one $20 fee.

Most magazines are registered with the Copyright Office as single collective entities themselves; that is, the individual works that make up the magazine are *not* copyrighted individually in the names of the authors. You'll need to register your article yourself if you wish to have the additional protection of copyright registration. It's always a good idea to ask that your notice of copyright (your name, the year of first publication, and the copyright symbol ©) be appended to any published version of your work. You may use the copyright notice regardless of whether or not your work has been registered.

While it is a good idea to have your notice of copyright appear with any published version of your work, it is not necessary to put it on unpublished submissions you send in for consideration to periodicals and publishing companies. They *know* your work is copyrighted simply by virtue of the fact that it exists. Writers who insist on displaying the copyright notice on manuscripts risk appearing amateurish and distrustful.

One thing writers need to be wary of is "work for hire" arrangements. If you sign an agreement stipulating that your writing will be done as work for hire, you will not control the copyright of the completed work—the person or organization who hired you will be the copyright owner. Work for hire arrangements and transfers of exclusive rights must be in writing to be legal, but it's a good idea to get every publishing agreement in writing before the sale.

You can obtain more information about copyright from the Copyright Office, Library of Congress, Washington DC 20559. To get answers to specific questions about copyright, call the Copyright Public Information Office at (202)707-3000 weekdays between 8:30 a.m. and 5 p.m. eastern standard time. To order copyright forms by phone, call (202)707-9100. A thorough (and thoroughly enjoyable) discussion of the subject of copyright law as it applies to writers can be found in Stephen Fishman's *The Copyright Handbook: How to Protect and Use Written Works* (Nolo Press, 1994). A shorter but no less enlightening treatment is Ellen Kozak's *Every Writer's Guide to Copyright & Publishing Law* (Henry Holt, 1990).

Finances and taxes

As your writing business grows, so will your obligation to keep track of your writing-related finances and taxes. Keeping a close eye on these details will help you pay as little tax as possible and keep you apprised of the state of your freelance business. A writing business with no systematic way of tracking expenses and income will soon be no writing business at all. If you dislike handling finance-related tasks, you can always hire someone else to handle them for a fee. If you do employ a professional, you must still keep the original records with an eye to providing the professional with the appropriate information.

If you decide to handle these tasks yourself—or if you just want to know what to expect of the person you employ—consider these tips:

Accurate records are essential, and the easiest way to keep them is to separate your writing income and expenses from your personal ones. Most professionals find that separate checking accounts and credit cards help them provide the best and easiest records.

Get in the habit of recording every transaction (both expenses and earnings) related to your writing. You can start at any time; you don't need to begin on January 1. Because you're likely to have expenses before you have income, start keeping your records whenever you make your first purchase related to writing—such as this copy of *Writer's Market.*

Any system of tracking expenses and income will suffice, but the more detailed it is, the better. Be sure to describe each transaction clearly—including the date; the source of the income (or the vendor of your purchase); a description of what was sold or bought; whether the payment was by cash, check or credit card; and the amount of the transaction.

The other necessary component of your financial record-keeping system is an orderly way to store receipts related to your writing. Check stubs, receipts for cash purchases, credit card receipts and similar paperwork should all be kept as well as recorded in your ledger. Any good book about accounting for small business will offer specific suggestions for ways to track your finances.

Freelance writers, artists and photographers have a variety of concerns about taxes that employees don't have, including deductions, self-employment tax and home office credits. Many freelance expenses can be deducted in the year in which they are incurred (rather than having to be capitalized, or depreciated, over a period of years). For details, consult the IRS publications mentioned below. Keep in mind that to be considered a business (and not a hobby) by the IRS you need to show a profit in three of the past five years. Hobby losses are deductible only to the extent of income produced by the activity.

There also is a home office deduction that can be claimed if an area in your home is used *exclusively* and *regularly* for business. Contact the IRS for information on requirements and limitations for this deduction. If your freelance income exceeds your expenses, regardless of the amount, you must declare that profit. If you make $400 or more after deductions, you must pay Social Security tax and file Schedule SE, a self-employment form, along with your Form 1040 and Schedule C tax forms.

Careful Research Grabs an Editor's Attention

Kathleen M. Heins

Pamela O'Brien

Having recently celebrated her ninth anniversary at *Ladies' Home Journal*, Features Editor Pamela Guthrie O'Brien has become an expert at unearthing the talent buried beneath the slush pile. It's no easy endeavor. On a typical day, O'Brien receives a stack of queries several feet high.

What makes a writer, even the beginner, stand out from the rest? "It really comes across when someone has taken the time to read the magazine and do his research," says O'Brien. "You think if they put that much effort into their query they're going to put a lot of work into any article they write for you." O'Brien says that two of her contributing editors were discovered in her slush pile.

"They both sent in terrific queries and you could tell they had really researched their ideas and our magazine," says O'Brien. "I can't emphasize enough the importance of reading at least a year of back issues before sending us a proposal."

Any response outside of the standard rejection letter, says O'Brien, should not be taken lightly. "When an editor tells you, 'Your idea isn't right for us but we'd like to hear more from you,' you should really take them up on that offer because they're not just saying it to be nice, they really mean it." O'Brien also recommends getting out some additional proposals fairly quickly after such a response while you're still fresh on the editor's mind.

What's the best way for a writer to break into *Ladies' Home Journal*? O'Brien says your best bet is to submit stories to their columns known as "A Woman Today" and "Woman to Woman". Although the magazine typically prefers queries over manuscripts, these two columns are an exception.

"A Woman Today" (mail to Box WT at the magazine) is a first-person, true-story column which runs 1,500 words. "These are stories of women who have overcome some terrible obstacles in life," says O'Brien. "They are pieces that make you think and you may not always agree with them but they're very provocative and sometimes controversial," she adds. "The person who reads them should be inspired and learn something from them."

"Woman to Woman" (mail to box WW), which runs 1,000 words, are stories that you would only tell your best friend. These are true stories about an experience that changed your life and that you would only share with a close female friend. All writers are kept anonymous upon request.

Getting published in one of these columns puts you in a better position to approach editors for bigger assignments. "Once you show you can do the job

you develop a relationship with editors at the magazine," says O'Brien. "It's like anything else. Once you have a foot in the door it's always easier."

The average response time at *Ladies' Home Journal* runs anywhere from one to three months "at the absolute latest." For columns such as "A Woman Today" and "Woman to Woman," writers need to be particularly patient regarding response time because of the abundance of submissions the magazine receives.

If you haven't received a response in a few months and you've included a SASE, O'Brien recommends sending a note along with another copy of the proposal. "Sometimes things do get lost in the mail; no system is perfect," says O'Brien, "but we ask people not to call us because a lot of time we're not going to remember their query off the top of our heads." Every query letter is carefully reviewed and everyone who sends in a SASE can expect a response.

When submitting proposals to *Ladies' Home Journal*, keep in mind their readership. Basically, they're 30 to 49 years old, married, have children and are balancing work with family. "Time is of an essence to our readers because they have a lot to do," says O'Brien.

Any proposal or manuscript should be accompanied by four or five clips and a SASE. "The more recent the clips the better," says O'Brien. "If someone sends me a clip from 1980, I wonder what they've been doing from 1980 until now. A résumé or bio sheet including a list of credits is also helpful."

One of the most common mistakes writers make in submitting ideas is proposing stories that have appeared in the magazine during the past year or even the previous month. O'Brien says it's also important writers check the masthead. "Don't send me stuff for the health editor and be sure to check the spelling of an editor's name before sending your query." Seasonal material should also be sent four to six months in advance.

Queries should be as specific as possible. "Really think it through, give me an example of the lead and tell me how you're going to research the piece and the angle you're going to take and keep it to two pages tops," says O'Brien. "You really need to be clear about what you're going to do," she adds. "If you're talking about a big subject such as breast cancer, the angle is particularly important because we've done this subject numerous times."

What would she like to see more of? *Ladies' Home Journal* is currently looking for psychology pieces, particularly those with a news hook. They're also interested in relationship ideas including situations that may arise between siblings or friends. O'Brien also suggests looking at your own life for ideas. "If there's something that's happend to you and a lot of your friends, chances are it's something that other women want to hear about too. Lately the magazine is also buying more inspirational, happy ending types of pieces."

Writers in other parts of the country, says O'Brien, may actually have an advantage over their New York City area counterparts in submitting proposals. "Sometimes you may read about a great story in a small newspaper that we may never hear of in New York."

O'Brien says that writers who believe in their abilities should not get discouraged. "If you've done all your homework don't give up," she says. "If you write a good proposal, even if it isn't right at the time, you're going to get some encouragement from an editor. Sometimes it takes a while to get in. Like anything else, you have to work at it."

A Writer's Guide to Money

By Gary Provost

A friend of mine, who I'll call Rocky, spent 15 years writing a very good 500-page novel. When he sold his novel to a major hardcover publisher he received an advance of $3,000, which he probably spent on therapy. The novel got a small first printing and good reviews. Soon after that all existing copies of the book were sucked into an enormous black hole, never to be seen again. Rocky's novel was not reprinted in paperback; no producer bought a movie option; no magazine published excerpts; nobody asked for Rocky's autograph. In short, Rocky's book met the fate of most literary first novels: no advertising, no publicity, few sales, a short life. Almost certainly, that $3,000 is all the money Rocky will ever receive for his 15 years of work.

On the other hand, Robert James Waller required only a few weeks to write *The Bridges of Madison County*. The book took up almost permanent residence on the best-seller list (96 weeks and counting as I write). In 1993 *The Bridges of Madison County* sold more copies than the top ten best selling books of 1983 combined. Waller's follow-up book, *Slow Waltz in Cedar Bend*, which some have seen as a thinly disguised rewrite of *Bridges*, also went directly to the bestseller list without passing go. Waller, a singer before he was a writer, has parlayed his fame into a successful CD. Steven Spielberg has bought film rights to *Bridges*. And Waller, I'm sure, now gets hundreds of letters from beautiful women offering to have his baby. All of this has brought to Waller a paycheck well into the multi millions of dollars, putting him in the same tax bracket as Shaquille O'Neal.

Hardly seems fair, does it?

Of course not. Rule number one about writing and money is that fair has nothing to do with it. Nobody is going to buy your book, short story or magazine article just because you worked really hard. "A fair day's pay for a fair day's work" doesn't apply to writing for a living.

If you want to understand how writers make money you must first lose a lifetime of assumptions about work and money. Specifically, you must delete these three ideas from your mind:

- My pay is related to the number of hours I work (the hourly wage);
- My pay is related to the number of items I produce (piecemeal);
- My pay is related to the quality of my work (merit).

Look at my example above. Waller worked fewer hours, wrote fewer pages and created a work of, some might argue, lesser quality. But his paycheck was thousands of times greater than Rocky's.

Certainly the hours put in, the volume of work turned out and the quality of your writing will contribute to the overall financial success of your writing career. But the number one determiner of your paycheck on any given project is not hours, volume or quality. It is the market. Who bought it? And who did they sell it to?

In the case of my friend Rocky, he sold his product to a book publisher and they in turn sold it to the small number of people who were willing to spend $22 for a

hardcover literary novel by an unknown writer. In the case of Waller, he sold his product to a big publisher, Warner Books, but for various reasons, Warner was able to sell *The Bridges of Madison County* to millions of people who had heard about the book.

Your short stories and magazine articles are also 'resold,' as part of the periodical in which they appear. The market for your article on how to frame your own photos can be the small town newspaper that in turn 'sells' it to their 5,000 subscribers, or the regional magazine that sells it to their 70,000 subscribers, or the big national magazine that sells it to their 3 million subscribers.

The editors of all these publications have two things in common: One, they are looking for well written material that will interest their readers, and two, they're not particularly concerned about how hard you worked to come up with the material. Did you make 30 phone calls trying to get that interview with Tommy Lee Jones, or did Tommy talk to you right away because he went to school with your cousin? They don't care. Did you walk into the library and find what you needed right away, or did you spend hours there because some sophomore was using the computer for his science project? They don't care. Did you use your research material in three other articles, thus making your time more cost effective, or is this article the only one you will write on the subject? They don't care. You are going to get paid what your work is worth to the editor, not what it is worth to you. In the case of Rocky that is bad news. In the case of Waller that is good news. So the question is not, "What's fair?" The question is what can you do to be more like a Waller than a Rocky.

Periodical pay rates

You can begin by understanding the writer's market. Let us start with magazines and newspapers. We can generalize and say that a magazine or newspaper makes money by selling advertising space. If a magazine has a big circulation it can charge advertisers more money, then it will have more money to spend on writers. That means that if you write a 750-word column about how to have fun with a fax machine and sell it to a small town newspaper you might get $30 for it. If you were to sell the same column to a newspaper in a mid-sized city, you might get $80-100 for it, and if you sold the column to a big city newspaper you might get $200-300 for it. If you write a 2,000-word article on tax revolt for a city magazine, like *Atlantic City Magazine*, you might get $300. Sell the same piece to a regional magazine like *Yankee* and maybe you'll get $900. Sell it to a big circulation national like *Reader's Digest* and maybe you'll get $2,000 or even $3,000. Same article, different markets.

This generalization is useful, but not absolute. There are, for example, magazines that don't need a lot of advertising money in order to pay you well, because they are not trying to make a profit. Magazines such as *Modern Maturity* exist not to make money on their own, but to serve the members of an organization, in this case the American Association of Retired Persons. In this year's *Writer's Market* you will find that *Modern Maturity* pays up to $3,000 for nonfiction articles. And there are hundreds of magazines which have low circulation but high ad rates because they are able to reach a very select audience. There are also magazines, like the *New Yorker*, that make a lot of money because they are able to reach the desirable upscale readers who can afford the sports cars and expensive evening wear advertised in their pages.

So you can see that the writer's market is sometimes as complex as the stock market and if you want to make money from your writing you must study this *Writer's Market*, and the publishers listed in it. Remember, better writing without better marketing won't earn you a dime more. The lifestyle editor of the local newspaper is not going

to pay you *Redbook* wages just because your piece on the history of spoons is of *Redbook* quality.

Efficient writing

However, as important as the market is, there are many things you can do as a writer to make money flow to you more often and in greater amounts. (Notice that I didn't say faster. Money moves very slowly toward writers. More about that later.)

While time, volume and quality are not directly responsible for the size of your paycheck, they will in the long run combine to make you solvent or lead you into bankruptcy. The freelance magazine and newspaper writers who are making a good living are the ones who have created an effective equation of marketing, quality and speed. The quality of your writing is what will help you compete with top writers for the best paying markets. And the speed of your writing will help you turn out a lot of material, even if it happens to be for lower-paying markets.

When you combine all of these—market awareness, good writing and speed—you have efficient writing. Efficient writing means not just studying the market and writing well, but thinking about how you can squeeze the most dollars from each hour spent on your writing and research. You will learn your own money-making tricks as you move through your career. But here are a few basics.

1. Use research time wisely. This means when you research a subject for an article, learn enough for two or three or more articles on the subject. This goes for books, too. If, like me, you write fiction and nonfiction, so much the better. I wrote a nonfiction book called *High Stakes: Inside the New Las Vegas*. Now I am working on a mystery that takes place in Las Vegas. The research is paying off twice.

2. Reslant your article for another magazine. Let's say you've written an article for *Inside Detective* on people who took the law into their own hands. Maybe one of your most interesting anecdotes concerns a Boston man who foiled a pet shop holdup. He might get three paragraphs in your piece for *Inside Detective*, but maybe you could write a complete article about his case for *Boston Magazine* or the Sunday supplements of the *Boston Herald* or *Boston Globe*.

When you can't use all of the research, use part of it. Maybe in your research you found that most of these people used handguns. You could use your stories as a taking off point in another article either for or against gun control.

3. Think about added value. To the writer added value means giving the customer a little bit more and getting paid for it. Once you've agreed to write an article on ceramic banks for, say $400, there are a few things you can do to fatten the paycheck. Artwork, meaning photos or illustrations, is usually paid for separately, and often brings in more money than the article itself, so be creative in coming up with ways to illustrate your article. Another source of revenue is sidebars. A sidebar is a small article, perhaps 200 words, that runs in a box beside or below the main article. For your article on ceramic banks, you could write a sidebar explaining how the pig came to be the model for piggy banks. (And by the way, the reason I thought of that example is that I came upon the answer while researching another article.)

4. Resell your article or story. As you thumb through your *Writer's Market* you will see that many magazines buy "reprint" rights or "second serial rights." That means they will pay you money for the right to publish a story or article that you have already published elsewhere. Maybe you spent ten hours on your piece about backyard swimming pools and you got $500. That's $50 an hour. Now you sell it again for $200. You've just raised your hourly rate to $70 an hour. Just be sure that you sold the previous publisher "first rights" only.

Another way to get more money for your magazine article or short story is to make it part of a book. For example, I once wrote an article called "The Seven Beacons of

Good Writing" for *Writer's Digest* magazine. I have sold reprint rights to that article to six different writing anthologies, for a total of $2,000.

Another possibility: Give a talk at the library or the Rotary Club on the subject you have written about.

Books and money

While the principles of efficient magazine writing also apply to book writing, there are important differences regarding money in book writing.

The money you get for writing a book comes from two sources: the royalties and advance, and the subsidiary rights.

Advance and royalties

Author royalties vary, but not by much. There are standards in the industry: ten percent of the cover price on a hardcover book, six to eight percent on a paperback. Usually there is an "escalator," an increase in the royalty rate after the book has sold a certain number of copies.

The advance is an amount of money you will get before the book is published, usually one half when you sign a book contract and one half when you deliver the completed manuscript. It is an advance against royalties and your royalty statements will arrive without a check until that advance has been earned back. I can give you some examples of advances, but I can't promise that they will be useful. Two women I know recently sold their first true crime books as paperback originals. One got $10,000, the other got $12,000. One of my students recently sold her first novel, a paperback original, for $8,000. Another sold his in hardcover for $4,000 and still another sold his in paperback for $3,000. I have another friend, very well established, who gets $300,000 advances for his hardcover novels. I have a friend who sold her first novel for a $7,000 advance, gradually worked her way up to $50,000 per paperback novel, and is now writing novels for about $30,000. My own advances for true crime books have been in the $50,000-70,000 range, but I only got $40,000 for a business book last year, $10,000 for a book about writing, and when I write a children's book I'm lucky to get $7,000. I know of one author who was offered a $15,000 advance for his novel by one publisher, and $400,000 by another.

As you can see, when it comes to money, book publishing is a very crazy business. Certainly the great majority of advances fall between $4,000 and $50,000, but there are many superstars like Stephen King and Jackie Collins, who get millions. Robert Waller probably got a small advance for *The Bridges of Madison County* because nobody had ever heard of him, but he probably got a zillion dollars for the next book because by then everybody had heard of him.

The reason for all this diversity is that the advance is based on perceptions, not realities. A publisher bases his advance on what he thinks the first print run of the book will be. That number is based on what he thinks will be the advance orders for the book. That guess, in turn, is based on how enthusiastic he thinks the sales force will be about selling the book. That guess could be based on what he thinks the finished manuscript will look like. And so forth. It is all guesswork fueled by such varied things as the fact that a similar book did well last year; the author has a good track record; Madonna has agreed to write a quote for the front jacket; Stephen Spielberg is interested in making a movie of it; or the author's agent has a reputation for discovering great new talents. Of course, it is not as much of a crapshoot as it seems, because these beliefs tend to be self-fulfilling. When you pay a million dollar advance to an author, you automatically print a lot of books and spend a lot of money on promotion and advertising.

Subsidiary rights

The other source of money for the book author comes from subsidiary rights. That is, all the rights he hasn't sold to the publisher. Subsidiary rights include audio rights, foreign rights, movie rights, electronic rights, serialization (in a magazine) rights, and in some cases the right to base a T-shirt, towel or desk calendar on your book. The best way to wring the most money out of these rights is to get a good literary agent before you sign the book contract.

Bad and good news

Certainly, there is some good news about writing and money. But first, two bits of bad news.

One, publishers do not look at you as a partner, they look at you as a supplier. This fact saddens me more than anything I have learned in 25 years of professional writing and I take no joy in breaking the news to you, but it's best that you know now. Publishers are not your friends. All of the horror stories you've heard are, unfortunately, true.

Literary agent, Richard Curtis, in his book *How to Be Your Own Literary Agent*, writes, "Publishers have always cheated authors. I believe that publishers are still cheating authors. There is little question that many authors are being taken for a ride totaling millions of dollars.

"Publishers kill authors by creative bookkeeping. By depriving authors of vital information about book sales, delaying disbursements interminably, obscuring the meaning of figures, manipulating collection dates of subsidiary income, and withholding excessive royalties as a cushion against returns, many publishers figuratively strangle writers and literally poison their good will."

The other bit of bad news is that Alaskan glaciers move much faster than does money in the publishing industry. My advance checks arrive two to four months after I sign the book contract. I've published 22 books and I have never seen a royalty statement arrive on time, and I don't know of any author who has. Most magazines pay for stories and articles 'on publication,' which means you could wait years for your check. Many pay 'on acceptance,' but that just means they begin the payment process when your piece is accepted. You still have months to wait. I know of at least one book publisher that requires five people in two cities to approve a check of any size before payment can be made. Everything about the payment process is designed to keep the money in the publisher's bank and out of your hands as long as possible.

So, if you are going to write for a living you simply have to accept the fact that what you do today as a writer will have no effect on your ability to pay your bills this month or next month or even the month after. You always have to be thinking six months ahead.

Did I say there was good news? Yes. The good news is that after all the small checks and the slow checks and the frustrations that come with this profession, we writers have something that sane people do not. We all have it in us to write that next bestseller that brings the six figure royalty checks, the movie deal, the book club offer, the huge paperback reprint, the letters from adoring fans. We won't all be Robert James Waller. In fact very few of us will be. But all of us can wake up each morning, knowing that we are part of a profession that makes that dream at least possible.

How Much Should I Charge?

Most freelance writers take on a variety of different types of writing work. Knowing what to charge for each job is a difficult task, as there are many factors involved in the decision. The size and scope of the job is a primary concern, but other variables such as your level of experience, the size of your client, the nature of your client's business and even where you and your client are located can affect how much you feel comfortable charging. All these considerations must be weighed carefully to come up with terms satisfying to both you and your client.

The information supplied in this section will help you get an idea of what other writers across the country are charging for different tasks. Yet, you will notice some of the ranges given are quite broad, taking location and other factors into account. To find out exactly what the market will bear in your area, networking with other writers is essential. Not only can contacts with others in your area give you an idea of what to charge, but you will also learn who uses freelance help and who the best clients are.

You'll want to make sure you aren't selling yourself short, of course, but you'll want to avoid pricing yourself out of the market. In preparing for a bid, look at the range of fees listed for that particular service. Then, using what you've learned from other writers in your area, try to assess how much you think the client is willing to pay. If you are unsure, ask them what they have budgeted for the project and start from there.

Location has had a strong influence on fees in the past and it is still true that you can charge higher fees in larger metropolitan areas. It used to be that you could charge more on the East or West Coasts, but larger cities in other areas such as Chicago or Houston are catching up.

The nature of your client's business can also affect how much you may want to charge. For example, work for business clients tends to bring higher fees than editorial work for magazines and newspapers. Nonprofit organizations do not generally pay rates as high as those paid by corporations. Smaller circulation publications tend to pay less than larger ones.

Your familiarity and experience with a particular type of work will also affect what you will charge. If you will be working in an area new to you, you may want to begin by charging an hourly rate rather than a flat fee.

One way to figure an hourly fee is to determine how much a company might pay per hour for someone on staff to do the same job. If, for example, you think a buyer would have to pay a staff person $26,000 per year, divide that by 2,000 (approximately 40 hours per week for 50 weeks) and you arrive at $13 per hour.

Next, add another 33% to cover the cost of fringe benefits that an employer normally pays (but that you must now absorb) in Social Security, unemployment insurance, hospitalization, retirement funds, etc. This figure varies from employer to employer, but the U.S. Chamber of Commerce reports that the U.S. average paid by employers is 37.6% of an employee's salary.

Then add another dollars-per-hour figure to cover your actual overhead expense

for office space, equipment, supplies; plus time spent on professional meetings, researching and writing unsuccessful proposals. (To get this figure, add one year's expenses and divide by the number of hours per year you have been freelancing.) In the beginning—when you may have large one-time expenses, such as a computer—you may have to adjust this figure to avoid pricing yourself out of the market. Finally, you may wish to figure in a profit percentage to be used for capital investments or future growth.

Here's an example:

$26,000 (salary) ÷ 2,000 (hours) = $13.00 per hour
+ 4.29 (33% to cover fringe benefits, taxes, etc.)
+ 2.50 (overhead based on annual expenses of $5,000)
+ 1.30 (10% profit margin)

$21.09 per hour charge

We present this formula to help you determine what to charge based on what a client might expect to pay a staff person on a per-hour basis. Keep in mind, however, that few "fulltime" freelancers bill 2,000 hours per year. Most who consider themselves fulltime end up billing for about half that many hours. Using this formula, therefore, will probably not bring in the same amount of money as a fulltime staff position. Some experienced freelancers keep this in mind when setting rates and adjust their hourly charge upward to compensate. Again, this depends on the client's budget, your experience and what that particular market will bear.

Once you have worked repeatedly for a particular client or have established a specific area of expertise, you will get a feel for the time and effort involved. Then you may feel more comfortable charging a flat fee for projects rather than an hourly rate. Businesses are sometimes more likely to agree to flat fees because they like to know ahead of time how much a project will cost.

Reservations about hourly rates can be alleviated through effective communication. Be sure to get a letter of agreement signed by both parties covering the work to be done and the fee or rate to be paid. If there is any question about how long the project will take, be sure the agreement indicates that you are estimating the time and that your project fee is based on a certain number of hours. If you quote a flat fee, you should stipulate in your agreement that a higher rate might be charged for overtime hours or late changes in the project.

If you find that the project will take more time, be sure to let the client know right away and be certain the client understands and approves of the additional time and charges. Be sure to have any renegotiated fees put in writing. Some freelancers require a partial payment as parts of the job are completed, so both you and the client have a better idea of the time involved.

Sometimes it is worth working for lower rates if it means gaining valuable experience or establishing yourself in a certain field. You may also agree to a low-paying assignment if it supports a cause that you believe in.

This year we have some rates charged by freelancers in Canada. Whenever this information is available, we indicate it within the categories. The figures given for Canadian rates are in Canadian dollars.

The rates given are generally for "average" projects within a field. For translation,

for example, translations from exotic languages into English or English into another language or translations of highly technical material will bring higher rates than the range listed. Whenever a project requires you to draw on your expertise in a technical area, you will be able to charge fees on the higher end of the range.

In markets where payment methods vary, both kinds of rates—hourly and per-project—are given so you have as many pricing options as possible. Please note that the categories often encompass a wide range due to responses from various locations and from writers at varying levels of experience.

Advertising, Copywriting & PR

Advertising copywriting: Advertising agencies and the advertising departments of large companies need part-time help in rush seasons. Newspapers, radio and TV stations also need copywriters for their small business customers who do not have agencies. Depending on the client, the locale and the job, the following rates could apply: $20-100 per hour, $250 and up per day, $500 and up per week, $1,000-2,000 as a monthly retainer. Flat-fee-per-ad rates could range from $100 and up per page depending upon size and kind of client. In Canada rates range from $40-80 per hour.

Book jacket copywriting: From $100-600 for front cover jacket plus flaps and back jacket copy summarizing content and tone of the book.

Brochures: $20-600 per published page or $100-7,500 and up per project depending on client (small nonprofit organization to large corporation), length and complexity of job.

Consultation for communications: *See Business & Technical Writing.*

Copyediting for advertising: $25 per hour.

Copywriting for book club catalogs: $85-200.

Direct-mail catalog copy: $75-200 per item; $150-1,000 per page.

Book Publishers

The path to publication

The book business, for the most part, runs on hunches. Whether the idea for a book comes from a writer, an agent or the imagination of an acquiring editor, it is generally expressed in these terms: "This is a book that I *think* people will like. People will *probably* want to buy it." The decision to publish is mainly a matter of the right person, or persons, agreeing that those hunches are sound.

Ideas reach editors in a variety of ways. They arrive unsolicited every day through the mail. They come by phone, sometimes from writers but most often from agents. They arise in the editor's mind because of his daily traffic with the culture in which he lives. The acquiring editor, so named because he is responsible for securing manuscripts for his company to publish, sifts through the deluge of possibilities, waiting for a book idea to strike him as extraordinary, inevitable, profitable.

In some companies, usually very large ones or very small ones, acquiring editors possess the authority required to say, "Yes, we will publish this book." In most publishing houses, though, the acquiring editor must prepare and present the idea to a proposal committee made up of marketing and administrative personnel. Proposal committees are usually less interested in questions of extraordinariness and inevitability than they are in profitability. The editor has to convince them that it makes good business sense to publish this book.

Once a contract is signed, several different wheels are set in motion. The author, of course, writes the book if he hasn't done so already. While the editor is helping to assure that the author is making the book the best it can be, promotion and publicity people are planning mailings of review copies to influential newspapers and review periodicals, writing catalog copy that will help sales representatives push the book to bookstores, and plotting a multitude of other promotional efforts (including interview tours and bookstore signings by the author) designed to dangle the book attractively before the reading public's eye.

When the book is published, it usually receives a concerted promotional push for a month or two. After that, the fate of the book—whether it will "grow legs" and set sales records or sit untouched on bookstore shelves—rests in the hands of the public. Publishers have to compete with all of the other entertainment industries vying for the consumer's money and limited leisure time. Successful books are reprinted to meet the demand. Unsuccessful books are returned from bookstores to publishers and are sold off cheaply as "remainders" or are otherwise disposed of.

The state of the business

If you've been reading the publishing industry trade magazines for the past year or so, you know that there has been some commotion at the large publishing houses. Somewhat large publishing companies are being bought up by larger publishing companies, who are in turn looking for ways to combine interests with giant companies in other areas of the entertainment industry. The fallout is—as it has always been when large companies seek first to become larger—an intense focus on the corporate bottom line. In the case of publishing, that translates to a "bestseller" mentality that tends to push all other concerns aside.

Publishers, like many other businesses these days, have been streamlining their operations in an effort to cut expenses and raise profits. Some imprints have been shut down altogether, and staffs have been cut. Many publishers talk about "trimming" their lists, publishing fewer books, in the coming seasons. That means fewer slots for new writers and an even more intense scrutiny paid to a book's marketability before a contract is offered.

Another effect of the recent mergers and staff cuts is that there are fewer people available in the publishing houses with the time or inclination to cull through the slush pile (the mass of unsolicited submissions that flows—slowly—through a publisher's editorial offices). Some houses refuse to consider unsolicited material of any kind, choosing instead to return it unopened or destroy it. Those who will look at unsolicited proposals are sometimes glacially slow to respond.

What all this means is that it is probably tougher now than it's ever been to break through at the large publishing houses. What this also means is that writers should consider channeling their efforts in other directions—toward the many medium and small publishers listed here. It is not our intention to discourage writers from trying their luck with the conglomerate publishers; if you are writing blockbuster commercial fiction or high-profile nonfiction (e.g., you are a celebrity or your subject is of intense interest to many people), they may be thrilled to hear from you. If not, you should consider concentrating your efforts on courting smaller, more specialized publishers.

What's hot

The bestseller lists of the past year indicate a continuing interest in several popular subjects. In nonfiction these include health care, relations between men and women, business and management advice, spiritual and psychological topics, dieting, and just about anything with a multicultural slant. Fiction bestsellers of the past year included love stories (led by the phenomenally successful *Bridges of Madison County*), still more legal thrillers (by now a genre in its own right), and an eclectic mix of more atypical fare such as *Pigs in Heaven*, *Like Water for Chocolate* and *Griffin & Sabine*. It's hard—and perhaps foolish—to predict what the hot topics will be in the coming year. One general bit of accepted wisdom is to pay close attention to the needs and interests of the "baby boom" generation. As they grow older, raise their families and head toward middle age and beyond, certain subjects will appeal to them, and they will often turn to books to solve a problem, learn a skill or entertain themselves.

How to publish your book

The markets in this year's Book Publishers section offer opportunities in nearly every area of publishing. Large, commercial houses are here as are their smaller counterparts; large and small "literary" houses are represented as well. In addition, you'll find university presses, industry-related publishers, textbook houses and more.

The Book Publishers Subject Index is the place to start. You'll find it before the General Index. Subject areas for both fiction and nonfiction are broken out for the more than 900 total book publisher listings. Not all of them buy the kind of book you've written, but this Index will tell you which ones do.

When you have compiled a list of publishers interested in books in your subject area, read the detailed listings. Pare down your list by cross-referencing two or three subject areas and eliminating the listings only marginally suited to your book. When you have a good list, send for those publishers' catalogs and any writer's guidelines available. You want to make sure your book idea is not a duplicate of something they've already published. Visit bookstores and libraries to see if their books are well represented. When you find a couple of books they have published that are similar to

Bantam VP on change and growth in publishing

Nita Taublit

As vice president and deputy publisher of Bantam Books, Nita Taublit is responsible for overseeing the publication of over 350 books each year. She is responsible for all aspects of the Bantam adult hardcover, trade and mass market paperback publishing program—from acquisition to scheduling to packaging and production.

We asked Taublit how recent upheavals (mergers, acquisitions, staff cuts, etc.) in the New York publishing world will affect writers hoping to publish with one of the big houses. "It's tough," she says. "I think the reason it's tough is because everybody is trimming down their list, not looking for fillers anymore." In today's economy, the time-honored publishing practice of allowing books not sold to be returned from the bookstores to the publisher is a source of financial strain and has caused publishers to publish and distribute somewhat more conservatively than in the past. "The number of titles published will continue to diminish," Taublit predicts. "It's not economically viable to publish things that have a limited distribution—to push out hundreds of thousands of books that you later eat. Every publishing company I can think of has trimmed its list."

While the current emphasis is on producing a taut and prosperous frontlist and keeping midlist publishing to a minimum, Taublit says most publishers are still interested in publishing good first-time novelists and nonfiction writers. "We have always published first-time writers, and we will continue to do so. They've just got to write a great book. One of the greatest pleasures I have is finding new writers and working with new writers who have talent."

If the opportunities in traditional book publishing are tightening up, there is one growth area that Taublit advises writers to keep an eye on—electronic media. "Book publishing as we know it in the next 10 or 15 years is going to change, with all the electronic publishing and the new media, the CD-ROM. But no matter what format it's in, we have got to have the talent; we have got to have the creative drive from the writers." Taublit sees the electronic horizon as offering not only opportunities for writers, but great benefits for the public, as well. "I'd like to think it will open up publishing, or reading, to people who perhaps don't traditionally read. Especially for younger children, I'm hoping that some of the things we're planning and that other publishers are planning that merge electronic publishing and traditional book publishing will bring those readers to publishing."

yours, write or call the company to find out who edited these books. This last, extra bit of research could be the key to getting your proposal to precisely the right editor.

Publishers prefer different kinds of submission on first contact. Most like to see a one-page query with SASE, especially for nonfiction. Others will accept a brief proposal package that might include an outline and/or a sample chapter. Some publishers will accept submissions from agents only. Virtually no publisher wants to see a complete manuscript on initial contact, and sending one when they prefer another method will signal to the publisher "this is an amateur's submission." Editors do not have the time to read an entire manuscript, even editors at small presses who receive fewer submissions. Perhaps the only exceptions to this rule are children's book manuscripts and poetry manuscripts, which take only as much time to read as an outline and sample chapter anyway.

In your one-page query, give an overview of your book, mention the intended audience, the competition (check *Books in Print* and local bookstore shelves), and what sets your book apart. Detail any previous publishing experience or special training relevant to the subject of your book. All of this information will help your cause; it is the professional approach.

Only one in a thousand writers will sell a book to the first publisher they query, especially if the book is the writer's first effort. Make a list of a dozen or so publishers that might be interested in your book. Try to learn as much about the books they publish and their editors as you can. Research, knowing the specifics of your subject area, and a professional approach are often the difference between acceptance and rejection. You are likely to receive at least a few rejections, however, and when that happens, don't give up. Rejection is as much a part of publishing, if not more, than signing royalty checks. Send your query to the next publisher on your list. You may be able to speed up the process at this early stage by sending simultaneous queries, but do so only to publishers who state they accept them.

Personalize your queries by addressing them individually and mentioning what you know about a company from its catalog or books you've seen. Never send a form letter as a query. Envelopes addressed to "Editor" or "Editorial Department" end up in the dreaded slush pile.

If a publisher offers you a contract, you may want to seek advice before signing and returning it. An author's agent will very likely take 15% if you employ one, but you could be making 85% of a larger amount. For more information on literary agents, contact the Association of Author's Representatives, 3rd Floor, 10 Astor Place, New York NY 10003, (212)353-3709. Also check the current edition of *Guide to Literary Agents* (Writer's Digest Books). Attorneys will only be able to tell you if everything is legal, not if you are getting a good deal, unless they have prior experience with literary contracts. If you have a legal problem, you might consider contacting Volunteer Lawyers for the Arts, 6th Floor, 1 E. 53rd St., New York NY 10022, (212)319-2787.

Special notice about subsidy publishing

Following the listings of Canadian and International Book Publishers, you'll find listings of Subsidy/Royalty Publishers.

Subsidy publishing involves paying money to a publishing house to publish a book. The source of the money could be a government, foundation or university grant, or it could be the author of the book. When a book publisher has informed us that it considers author-subsidy arrangements, we have placed that publisher in the Subsidy/Royalty section. For more information on subsidy publishing, see the introduction to Subsidy/Royalty Book Publishers on page 232.

First-time author breaks in with reference work

Tom Ogden

Tom Ogden's first book is a reference volume on the history of the circus. *Two Hundred Years of the American Circus: From Aba-Daba to the Zoppe-Zavatta Troupe* was published in 1993 by Facts on File, Inc., a New York-based publisher of reference works and other "informational" nonfiction trade books. The book, an encyclopedia, is a 400-page hardbound collection of fascinating circus facts and photographs. It also represents three years of Ogden's life and labor.

Ogden is a professional magician and motivational speaker. His background includes stints with several circuses. He called on that background and his abiding interest in circuses when a writer friend, Michael Kurland, suggested that Facts on File might be interested in an encyclopedia of the circus. "So I put together a proposal package," says Ogden, "which consisted of a three- or four-page introductory letter saying what I proposed to do, why the book was needed, why I was the person who should write it and who I thought would buy it." The proposal also contained several sample entries of various lengths to give the editors an idea of his writing ability and his vision for the book. After the publisher expressed enthusiasm about the project, Ogden contacted an agent who agreed to represent him in negotiating the contract. The proposal committee at Facts on File agreed to publish the book, and it took "three or four months" for the agent and publisher to work out the contract.

Ogden began his research in earnest after the contract was signed. "I amassed a huge library about the circus. I joined all the fraternal and historical circus societies to get their literature, their magazines, and to get contacts of people I could call. And I did a lot of interviewing. To find birth and death dates, I spent weeks at the library going through obituaries. I wanted this to be the most complete and accurate reference book ever written on the circus." Typical of many book projects, in light of ever-shifting editorial personnel in the publishing industry, Ogden's circus book was overseen by three different editors throughout the period when he was researching and writing.

After the first draft was completed, Ogden's editor dove into the manuscript. "Three months later, I got my edited manuscript back. I found some little style corrections, things they didn't like, which I started arguing about. Well, I discovered very quickly that you compromise on a lot of things so that you can save your ammunition for the fights you really want to win." Ogden chose to relent on most of the publisher's stylistic preferences but stood firm on some of the

larger content decisions he found questionable. When the book was finally printed, Ogden says he found the arrival of the finished books anticlimactic. "What was exciting was not the finished book—the proof pages were what I found exciting, because that was when I first saw the words typeset. At that point I knew it was going to be a book."

Two Hundred Years of the American Circus has done well. It was named Best Reference Book of 1993 by the American Library Association. And Facts on File has paid Ogden the highest compliment an author can hope for from a publisher: They've signed a contract for his second book.

encourage you to work with publishers that pay a royalty. If one of the publishers in the Book Publishers section offers you an author-subsidy arrangement (sometimes called "cooperative publishing" or "co-publishing") or asks you to pay for all or part of the cost of any aspect of publishing (printing, advertising, etc.) or asks you to guarantee the purchase of any number of the books yourself, we would like you to let us know about that company immediately.

Publishers are offering more author-subsidy arrangements than ever before. Some publishers feel they must seek them to expand their lists beyond the capabilities of their limited resources. While this may be true, and you may be willing to agree to it, we would like to keep subsidy publishers and royalty publishers separate, so that you will be able to choose more easily between them.

Publishers that publish fewer than four books per year, but not more than 50% of them on an author-subsidy basis, are still listed in Small Presses with an asterisk (*). Author-subsidy publishers in Canada are also denoted with an asterisk (*), and are listed in Canadian and International Book Publishers.

For a list of publishers according to their subjects of interest, see the nonfiction and fiction sections of the Book Publishers Subject Index. "We have few specific needs except for books that are fresh, interesting and well written. Again, fad topics are dangerous, as are works you haven't polished to the best of your ability. (The competition is fierce.) We've been inundated with dragon stories (misunderstood dragon befriends understanding child), unicorn stories (misunderstood child befriends understanding unicorn), and variations of 'Ignatz the Egg' (Everyone laughs at Ignatz the egg [giraffe/airplane/accountant] because he's square [short/purple/stupid] until he saves them from the eggbeater [lion/storm/I.R.S. man] and becomes a hero). Other things we don't need at this time are safety pamphlets, ABC books, and rhymed narratives. In writing picture book texts, avoid the coy and 'cutesy.' BETTER HOMES AND GARDENS BOOKS, Division of the Meredith Corporation, 1716 Locust St., Des Moines IA 50309-3023. Editorial Director and Vice President: Elizabeth P. Rice. Estab. 1930. Publishes hardcover and trade paperback originals. Averages 40 titles/year. "Although many of our books are produced by on-staff editors, we often buy book-length manuscripts from outside authors. We also use freelance writers on assignment for sections or chapters of books already in progress." Reports in 6 weeks.
Nonfiction: "We publish nonfiction in many family and home-service categories, including gardening, decorating and remodeling, crafts, money management, handyman's topics, cooking and nutrition, Christmas activities, and other subjects of home-service value. Emphasis is on how-to and on stimulating people to action. We require concise, factual writing. Audience is comprised of readers with home and family as their main center of interest. Style should be informative and lively with a straightforward approach. Stress the positive. Emphasis is entirely on reader service. Because most of our books are produced by on-staff editors, we're less interested in book-length manuscripts than in hearing from freelance writers with solid expertise in gardening, do-it-yourself, health/fitness, and home decorating. We have no need at present for cookbooks or craft books. The Executive Editor recommends careful study of specific Better Homes and Gardens Books titles before submitting material." Prefers outline and sample chapters. ***"Please include SASE with appropriate return postage."***
Tips: "Writers often fail to familiarize themselves with the catalog/backlist of the publishers to whom they are submitting. We expect heavier emphasis on health/fitness, gardening and do-it-yourself titles. But, again, we're most interested in hearing from freelance writers with subject expertise in these areas or in receiving queries for book-length manuscripts. Queries/mss may be routed to the Executive Editor in the publishing group."

Nonfiction: "We publish for members of The Church of Jesus Christ of Latter-Day Saints (Mormons) and do not distribute to the national market. All our books are closely oriented to the faith and practices of the LDS church, and we will be glad to review such mss. Those which have merely a general religious appeal are not acceptable. We do not publish anti-Mormon works. We also publish short and moderate length books for children and young adults, and fiction as well as nonfiction. These reflect LDS principles without being 'preachy'; must be motivational. 30,000-45,000 words is about the right length, though good, longer mss are not ruled out. Then send that proposal to a publisher whose books you believe are excellent and who targets the same audience you are aiming at. Once the proposal was in the mail, I'd forget about it. Keep learning more about the computer and develop another book proposal. *Don't write a book without a go-ahead from a publisher.* The chances are too great that you will spend six months writing a book, only to discover that there are nine on the market with the same concept by the time your manuscript is ready to send out."

No science fiction or fantasy, and we're not big for historical romance or *anything* with salacious sex, unwarranted violence or material intended to shock simply for shock's sake. The chance of our accepting a fiction manuscript is very slim—we've published one novel in two years. The writing must be of *superior* quality before we will even consider it."

Nonfiction: How-to, reference, technical. Subjects include business and economics, government/politics and law. "The publisher is interested in reviewing manuscripts which deal with technical legal and business areas, including banking, in a manner which withstands the scrutiny of the industry, but appeals to the lay person reader. No biographies, autobiographies, cookbooks, art-related books, juvenile, alternative/New Age, religion, self-help psychology or humor books please." Reviews artwork/photos as part of ms package.
Tips: "When considering a manuscript, the most essential element evaluated is the ability of the writer to impart the information in clear, concise language, creating an elegant delivery of the subject matter. Our audience consists of both the professional and general public communities. If I were a writer trying to market a book today, I would allow my editor to prevail in implementing revisions which will ultimately result in a better ms. Unless the editing is fatal to the originally intended thought, the writer should allow the editor to polish and fine tune the ms."

Nonfiction and Fiction: "We publish a general trade list of adult fiction and nonfiction, cookbooks and semi-reference works. The emphasis is on selectivity because we publish only 30 titles a year. Our general fiction list, which is very small, represents an attempt to combine quality with commercial potential. We also publish westerns. Our most successful nonfiction titles have been related to health and the behavioral sciences. No limitation on subject. A writer should clearly indicate what his book is all about, frequently the task the writer performs least well. His credentials, although important, mean less than his ability to convince this company that he understands his subject and that he has the ability to communicate a message worth hearing." Tips: "Writers have the best chance selling us well written, unique works that teach serious horse people how to do something better. If I were a writer trying to market a book today, I would offer a straightforward presentation, letting work speak for itself, without hype or hard sell. Allow publisher to contact writer, without frequent calling to check status. They haven't forgotten the writer but may have many different proposals at hand; frequent calls to 'touch base,' multiplied by the number of submissions, become an annoyance. As the publisher/author relationship becomes close and is based on working well together, early impressions may be important, even to the point of being a consideration in acceptance for publication."

Recent Fiction Title: *In the Mountains of America*, by Willis.
Tips: "Our reader is a person who is discriminating about his/her reading material, someone who appreciates the extra care we devote to design, paper, cover, and exterior excellence to go along with the high quality of the writing itself. Be patient with us concerning responses: it's easier to reject the manuscript of a nagging author than it is to decide upon it. The manner in which an author deals with us (via letter of phone) gives us a sense of how it would be to work with this person for a whole project; good books with troublesome authors are to be avoided."

• Due to movie tie-in, and good marketing, Naiad Press has rebounded strongly from a 1992-low.

Fiction: "We publish lesbian fiction, preferably lesbian/feminist fiction. We are not impressed with the 'oh woe' school and prefer realistic (i.e., happy) novels. We emphasize fiction and are now heavily reading manuscripts in that area. We are working in a lot of genre fiction—mysteries, short stories, fantasy—all with lesbian themes, of course. We have instituted an inhouse anthology series, featuring short stories only by our own authors (i.e. authors who have published full length fiction with us or those signed to do so)." Query.

Tips: "There is tremendous world-wide demand for lesbian mysteries from lesbian authors published by lesbian presses, and we are doing several such series. We are no longer seeking science fiction. Manuscripts under 60,000 words have twice as good a chance as over 60,000."

Tips: "We specialize in books for working professionals: engineers, architects, contractors, interior designing, etc. The more technically complex the manuscript is the happier we are. We love equations, tables of data, complex illustrations, mathematics, etc. In technical/professional book publishing, it isn't always obvious to us if a market exists. We can judge the quality of a manuscript, but the author should make some effort to convince us that a market exists. Facts, figures, and estimates about the market—and marketing ideas from the author—will help sell us on the work. Besides our interest in highly technical materials, we will be trying to broaden our range of titles in each discipline. Specifically, we will be looking for career guides for interior designers and architects, as well as for engineers."

Also, we are seeking manuscripts that deal with Catholic identity—explaining it, identifying it, understanding it. The book cannot be the place for the author to think through a subject. Style uses anecdotes, examples, illustrations, human interest, 'colorful' quotes, fiction techniques of suspense, dialogue, characterization, etc. Address practical problems, deal in concrete situations, free of technical terms and professional jargon. We do not publish fiction, poetry, autobiography, personal reflections, academic studies, art or coffee-table books."

Recent Nonfiction Title: *Running a One-Person Business*, by Claude Whitmyer, Salli Raspberry and Michael Phillips (business/career).
Tips: "We like books from people who really know their subject, rather than people who think they've spotted a trend to capitalize on. We like books that will sell for a long time, rather than nine-day wonders. Our audience consists of a well-educated, slightly weird group of people who like food, the outdoors and take a light but serious approach to business and careers. If I were a writer trying to market a book today, I would really study the backlist of each publisher I was submitting to, and tailor my proposal to what I perceive as their needs. Nothing gets a publisher's attention like someone who knows what he or she is talking about, and nothing falls flat like someone who obviously has no idea who he or she is submitting to."

Only a small fraction of the mss received can be seriously considered for publication. Most books result from contacts that acquisitions editors make with qualified authors, though from time to time an unsolicited proposal triggers enough excitement to result in a contract. A writer has the best chance of selling Victor a well-conceived and imaginative manuscript that helps the reader apply Christianity to his/her life in practical ways. Christians active in the local church and their children are our audience."

Writers have the best chance of selling to our press completed manuscripts on regional history. We have developed our marketing in the direction of regional and local history and have attempted to use this as the base around which we hope to expand our publishing program. In regional history, the secret is to write a good narrative—a good story—that is substantiated factually. It should be told in an imaginative, clever way. Have visuals (photos, maps, etc) available to help the reader envision what has happened. Tell the local or regional history story in a way that ties it to larger, national, and even international events. Weave it into the large pattern of history."

Canadian and International Book Publishers

This section lists book publishers whose addresses of principal contact lie outside the United States. Some of the publishers listed in this section also have offices in the U.S. A few of the publishers listed in the previous section have offices worldwide, and are certainly "international" in the subjects of the books they publish and distribute.

The Canadian and International Book Publishers section is intended for writers whose ideas and books are better suited for the Canadian or international marketplace. Writers should be aware that the requirements of these publishers are quite different from those of their U.S. counterparts. Some publishers listed here concentrate solely on subjects and authors from their own countries (or landed immigrants) and do not accept queries, proposals or manuscripts from American writers.

There is more government support of book publishing in Canada than in the U.S. A number of national and provincial arts councils subsidize book publishing. Most subsidy arrangements with Canadian publishers involve such an agency, not the author, as the source of the subsidy. However, there are a few author-subsidy publishers in Canada and writers should proceed with caution when they are made this offer. We have denoted partial author-subsidy publishers with an asterisk (*).

Despite a healthy book publishing industry, Canada is still dominated by publishers from the United States. Two out of every three books found in Canadian bookstores are published in the U.S. These odds have made some Canadian publishers even more determined to concentrate on Canadian authors and subjects. Writers interested in additional Canadian book publishing markets should consult *Literary Market Place* (R.R. Bowker & Co.), *The Canadian Writer's Guide* (Fitzhenry & Whiteside) and *The Canadian Writer's Market* (McClelland & Stewart).

International mail

Whatever your nation of residence may be, enclose International Reply Coupons (IRCs) with all correspondence to publishers outside your country. Postage stamps from your country are not valid on letters and parcels originating elsewhere. Publishers receiving SASEs and manuscripts with stamps from other countries are not likely to return or respond to the material, as international mailing costs are a considerable expense.

To defer a portion of this expense otherwise paid by you, consider sending disposable (photocopies or computer generated) outlines, synopses, sample chapters or manuscripts. This eliminates the cost of having an entire manuscript package returned to you. One IRC will cover the cost of the publisher's reply. They are available at post offices all over the world and can be redeemed for stamps of any country. Please note that the cost for items such as catalogs is expressed in the currency of the country in which the publisher is located.

For a list of publishers according to their subjects of interest, see the nonfiction and fiction sections of the Book Publishers Subject Index. Information on some book pub-

lishers and producers not included in this edition of *Writer's Market* can be found in Book Publishers and Producers/Changes '94-'95.

Fiction: Experimental, feminist, historical, literary, short story collections. "Our needs in fiction never change: substantial, character-centred literary fiction (either as novel or collection of short stories) which shows more interest in the craft of writing (i.e. use of language, credible but clever plotting, shrewd characterization) than in cleaving to tired, mainstream genre-conventions. No children's, YA, mainstream, mass market, genre, mystery, thriller, confessional or sci-fi fiction." Query or submit complete ms.
Tips: "Trends we have noticed are continuing cutbacks, close-downs, belt-tightening, and drying-up of funds and government support for the arts. Writers should send us books that show a very well-read author who has thought long and deeply about the art of writing and, in either fiction or nonfiction, has something of Canadian relevance to offer. We almost never publish books by non-Canadian authors. Our audience is literate, thoughtful, well-read, non-mainstream. If I were a writer trying to market a book today, I would contact the targeted publisher with a query letter and synopsis, and request a book catalog and ms guidelines. Purchase a recent book from the publisher in a relevant area, if possible. Never send a complete manuscript blindly to a publisher. Never send a manuscript or sample without IRC's or sufficient return postage in Canadian stamps."

Subsidy/Royalty Book Publishers

In this section you'll find listings for U.S. book publishers that publish even a small percentage of their books on an author-subsidy basis.

Also known as "vanity presses," "co-publishers" or "cooperative publishers," they offer services ranging from editing and printing your book to distributing and promoting it. They are called "subsidy" publishers because they ask you, the author, to subsidize (pay for) all or part of the cost of publishing your book. Their prices can run as high as $25,000.

Letters making subsidy offers sometimes are the first and only encouraging correspondence writers receive about their book proposals. You should read with a grain of salt how much a publisher loves your book if they are asking you to pay for its production, marketing and/or distribution. Other letters express how much a publisher would like to publish a writer's book, if only they had sufficient funds. They ask if you, the author, would consider investing in a portion of the cost of the book's publication. These letters are often persuasive, and perhaps you will decide that co-publishing may be the route you want to take. Just be certain you know what you're getting into.

Full subsidy publishers often argue that the current economic climate necessitates authors paying the costs of publishing. Because subsidy publishers make a profit on simply producing 1,000 or so bound books, they don't have a stake in marketing the books they publish. Royalty publishers, on the other hand, must sell books to make money because they pay the publishing costs.

Before agreeing to a subsidy contract, ask yourself some questions. What would you do with 1,000 or even 500 copies of your book, if the distribution were left to you? How many do you realistically think you could sell? Few bookstores deal with individuals selling single books. Talk to a local bookstore owner before you sign a contract to see if they stock any titles by the publisher who wants to print your book.

In a co-publishing arrangement, the publisher will usually market its co-published books because it has paid part of the production cost, but writers have other concerns. How do you know the 50% you are paying is truly 50% of the total cost? If you are unsure, call a printer in your area and ask for an estimated cost of printing the type and number of books the publisher has proposed to you. If the printer's quote is significantly lower than the original figure you received, contact the publisher to discuss the matter.

Also at issue is your royalty arrangement. Often a writer is asked for up to half the cost to publish a book, and yet offered a royalty of less than 15%. Authors eager to have their books published find themselves adding up the number of sales they would need to break even. They forget that bookstores take 40-50% of the cover price for each copy they sell, and there are other charges: distributors, shippers and wholesalers all must be paid as well. Be realistic about what you think you could make back, and proceed cautiously.

Don't bow to pressure from any subsidy publisher who claims you must "act now" or the offer to publish may be withdrawn. Don't confuse subsidy publishers with royalty publishers. Unlike the relationship you might have with a royalty publisher, in which

you attempt to earn their favor, you are a subsidy publisher's *customer*, not a supplicant. And as a customer, you should approach the relationship as you would when considering the purchase of any other service—with a dose of skepticism and clear ideas about the contractual assurances you want to see. It is recommended that you consult with an attorney before signing any publishing contract.

If you are truly committed to your book and think there is a market for it, consider self-publishing as an option. It generally costs less than subsidy publishing for essentially the same services, and you have much more control over what is done with your book. For more information on self-publishing, take a look at *The Complete Guide to Self-Publishing*, by Tom and Marilyn Ross (Writer's Digest Books) or *The Publish It Yourself Handbook*, by Bill Henderson (Pushcart Press). In any case, proceed with caution any time a publisher is asking you to finance all or part of the cost of publication.

While we encourage writers to sell their work to royalty publishers, we have listed other book publishing options here. Publishers with the longer listings publish at least 50% of their books on a royalty basis. The shorter listings at the end of this section are the names and addresses of publishers producing more than 50% of their books on an author-subsidy basis.

For a list of publishers according to their subjects of interest, see the nonfiction and fiction sections of the Book Publishers Subject Index. Information on some book publishers and producers not included in this edition of *Writer's Market* can be found in Book Publishers and Producers/Changes '94-'95.

Engineers and scientists should consider trained technical writers as co-authors. We are now more open to 'entry-level' overviews of a technical specialty. Our audience consists of engineers—largely at management and project leader levels. If I were a writer trying to market a book today, I would work with a good agent or other experienced writer with contacts and knowledge of the 'system.' Authors expend too much energy, and endure unnecessary frustration, because they don't know how to match a good idea and respectable proposal with the *appropriate* publishers."

Writers commonly fail to identify publishers who specialize in the subject areas in which they are writing. For example, a publisher of textbooks isn't interested in novels, or one that specializes in elementary education materials isn't going to want a book on auto mechanics."

Small Presses

"Small press" is a relative term. Compared to the dozen or so conglomerates, the rest of the book publishing world may seem to be comprised of small presses. Several of the publishers listed in the Book Publishers section consider themselves small presses and cultivate the image. For our purpose of classification, the publishers listed in this section are called small presses because they publish three or fewer books per year.

The publishing opportunities are slightly more limited with the companies listed here when compared to those in the larger Book Publishers section. Small presses are usually not able to market their books as effectively as larger publishers. Their print runs and royalty arrangements are usually smaller. It boils down to money, what a publisher can afford, and in that area, small presses simply can't compete with conglomerates.

However, realistic small press publishers don't try to compete with Bantam or Random House. They realize everything about their efforts operates on a smaller scale. Most small press publishers get into book publishing for the love of it, not solely for the profit. Of course, every publisher, small or large, wants successful books. But small press publishers often measure success in different ways.

Many writers actually prefer to work with small presses. Since small publishing houses are usually begun based on the publisher's commitment to their subject matter, and since they necessarily work with far fewer authors than the conglomerates, small press authors and their books usually receive more personal attention than the larger publishers can afford to give them. Promotional dollars at the big houses tend to be siphoned toward a few books each season that they have decided are likely to succeed, leaving hundreds of "midlist" books underpromoted, and, more likely than not, destined for failure. Since small presses only commit to a very small number of books every year, they are vitally interested in the promotion and distribution of each title they publish.

Just because they publish three or fewer titles per year does not mean small press editors have the time to look at complete manuscripts. In fact, because most small presses are understaffed, the editors have even less time for submissions. The procedure for contacting a small press with your book idea is exactly the same as it is for a larger publisher. Send a one-page query with SASE first. If the press is interested in your proposal, be ready to send an outline or synopsis, and/or a sample chapter or two. Be patient with their reporting times; small presses are usually slower to respond than larger companies. You might consider simultaneous queries, as long as you note them, to compensate for the waiting game.

For more information on small presses, see *Novel & Short Story Writer's Market* and *Poet's Market* (Writer's Digest Books), and *Small Press Review* and *The International Directory of Little Magazines and Small Presses* (Dustbooks).

For a list of publishers according to their subjects of interest, see the nonfiction and fiction sections of the Book Publishers Subject Index. Information on some book publishers and producers not included in this edition of *Writer's Market* can be found in Book Publishers and Producers/Changes '94-'95.

INSIDER REPORT

Writers receive personal attention from small niche publisher

Barbara Brown

It's difficult for Barbara Brown to talk about her company, Naturegraph Press, without mentioning her late husband, Vinson Brown, a well-known naturalist and author who founded the press in 1946. He started the firm to publish materials primarily for schools to teach children about nature.

Vinson was publishing classroom materials and lecturing on nature topics at schools throughout the West when he met and married Barbara, an elementary school teacher. "Thereafter, I worked in the company and never went back to teaching," she says.

At the time, Vinson was establishing himself as both a scholarly and popular nature writer and it was his difficulties with a university press that led to his publishing one of his own books as Naturegraph's first book. The university press was going through a period of high editorial turnover, and after three editors and three complete rewrites, Vinson decided he would do better to publish his book himself. This marked the change in Naturegraph from a publisher of auxiliary school materials to a book publisher.

Since that first book, says Brown, Naturegraph has published hundreds of nature titles and currently keeps about 100 books in print. "Originally the main focus for the press was nature books, such as *Handbook of California Birds* and *Rocks and Minerals of California*. We did a little book called *Common Edible and Useful Plants of the West* that has sold more than 132,000 copies. Then we began publishing books on Native Americans with about an equal emphasis as nature books. We also publish a few books on gardening, health and 'wit and wisdom,' but these are sidelines to our main focus."

Naturegraph publishes between two and four new books every year. The publisher receives about 400 queries or submissions a year, so the competition is very keen, says Brown. "Many such submissions are very easy to reject because they are not on a subject we handle. The biggest mistake a writer can make is not to find out first what a publisher is looking for.

"I prefer getting nice short queries, accurately to the point, describing the work. In particular I like it if writers list other works of a similar nature that have already been published and the advantages they see in theirs. It shows they've done research and have an interest in their field," she says. Brown prefers to see a query letter with an outline or sample chapters instead of a complete

manuscript.

Brown looks for works that are "written simply, that can be clearly understood. I've read or tried to read scientific books where every third word is a scientific term. I guess that's needed for upper class university students or very advanced people in a particular area, but we leave that type of publishing to the university presses."

In other words, Brown looks for material that can be easily understood by the layman. "We truly do love the wilds, so we feel the more plants and animals people can identify and the more familiar they are with nature, the more likely they will be to protect their newfound friends and less likely to destroy or kill."

As a small publisher Brown appreciates authors who are willing to get involved with the promotion of their book. Many provide her with lists of contacts and lists of potential reviewers. A handful even buy books from the company at a distributor's discount and sell books themselves.

There are certain advantages to working with a small press, says Brown. "Writers get a lot of personal attention and many of our writers have become lifelong friends. There's correspondence back and forth with the editor and myself and almost all the writers I've worked with say they've seen a big improvement in their work. The deadwood gets chopped out which seems to clarify their writing, something a lot of authors cannot do for themselves."

Another important advantage is niche publishing. Naturegraph has a close relationship with its distributors and has become known by them for publishing books in specific fields. Larger companies, says Brown, may not know how to handle a particular book and are at a disadvantage because buyers do not connect their name with that type of book. In a few cases, Naturegraph was very successful with books it took over after a larger company had let them go out of print because of poor sales.

Brown says she's learned a lot about the writer's side of publishing through her husband, who published about 40 titles with a variety of publishers over the years, including Little Brown, Prentice Hall, Stanford University Press and Stackpole Books. "He never gave up. He knew that even if you are fairly established you still get rejects and many rejects come for every acceptance. There's a lot of competition even in the small press. But if you study your publishers and send the right thing to the right publisher . . . if you've done your homework and have something well written, you just have to be persistent."

Book Producers

Book producers provide services for book publishers, ranging from hiring writers to editing and delivering finished books. Most book producers possess expertise in certain areas and will specialize in producing books related to those subjects. They provide books to publishers who don't have the time or expertise to produce the books themselves (many produced books are highly illustrated and require intensive design and color-separation work). Some work with on-staff writers, but most contract writers on a per-project basis.

Most often a book producer starts with a proposal, contacts writers, editors and illustrators, assembles the book, and sends it back to the publisher. The level of involvement and the amount of work to be done on a book by the producer is negotiated in individual cases. A book publisher may simply require the specialized skill of a particular writer or editor, or a producer could put together the entire book, depending on the terms of the agreement.

Writers have a similar working relationship with book producers. Their involvement depends on how much writing the producer has been asked to provide. Writers are typically paid by the hour, by the word, or in some manner other than on a royalty basis. Writers working for book producers usually earn flat fees. Writers may not receive credit (a byline in the book, for example) for their work, either. Most of the contracts require work for hire, and writers must realize they do not own the rights to writing published under this arrangement.

The opportunities are good, though, especially for writing-related work, such as fact checking, research and editing. Writers don't have to worry about good sales. Their pay is secured under contract. Finally, writing for a book producer is a good way to broaden experience in publishing. Every book to be produced is different, and the chance to work on a range of books in a number of capacities may be the most interesting aspect of all.

Book producers most often want to see a query detailing writing experience. They keep this information on file and occasionally even share it with other producers. When they are contracted to develop a book that requires a particular writer's experience, they contact the writer. There are well over 100 book producers, but most prefer to seek writers on their own. The book producers listed in this section have expressed interest in being contacted by writers. For a list of more producers, contact the American Book Producers Association, Suite 604, 160 Fifth Ave., New York NY 10010, or look in *Literary Market Place* (R.R. Bowker).

For a list of publishers according to their subjects of interest, see the nonfiction and fiction sections of the Book Publishers Subject Index. Information on some book publishers and producers not included in this edition of *Writer's Market* can be found in Book Publishers and Producers/Changes '94-'95.

Nonfiction: Business/economics, cookbooks, cooking and foods, health, hobbies, how-to, self-help, sports, consumerism. "Ours is a very specialized kind of publishing—for clients (industrial and association) to use in promotional, PR, or educational programs. If an author has an idea for a book and close connections with a company that might be interested in using that book, we will be very interested in working together with the author to 'sell' the program and the idea of a special book for that company. Once published, our books often get trade distribution through a distributing publisher, so the author generally sees the book in regular book outlets as well as in the special programs undertaken by the sponsoring company. We do not encourage submission of manuscripts. We usually commission an author to write for us. The most helpful thing an author can do is to let us know what he or she has written, or what subjects he or she feels competent to write about. We will contact the author when our needs indicate that the author might be the right person to produce a needed manuscript." Query.

Consumer Magazines

In the past year, a record number of consumer magazines were launched. Magazines folded, too, of course, but overall the consumer magazine industry continues to be a healthy market for the freelance writer. The start-up of hundreds of new magazines can be little else but good news for writers. But with those new magazines come ever-higher expectations from the editors responsible for filling their pages. Today's consumer magazines are tightly focused marketing vehicles aimed at very specific segments of the reading public.

When periodicals succeed in finding readers, they attract advertisers hoping to reach those same readers—those *consumers*. As long as enough advertisers find a particular magazine useful in reaching their customers, that magazine will thrive. If the magazine fails in its editorial mission—if its content does not match the interests of its intended audience—it will lose readers and advertisers and it will fold.

Consumer magazines and the freelance writer

The most important recommendation we can make to writers trying to crack the consumer magazine market, besides, of course, perfecting the craft of writing, is to work hard at understanding your target magazine's audience and angle. One of the complaints we hear most frequently from editors is that freelance writers very often send inappropriate material, i.e., material that—while it may be entertaining, well-written and timely—is simply not of interest to that magazine's readers.

You can gather clues about a magazine's readership in a number of ways:

- Start with a careful reading of the magazine's listing in this section of *Writer's Market*. Most listings offer very straightforward information about their magazine's slant and audience.
- Send for a magazine's writer's guidelines, if available. These are written by each particular magazine's editors and are usually quite specific about their needs and their readership.
- If possible, talk to an editor by phone. Many will not take phone queries, particularly those working at the higher-profile magazines. But many editors of smaller publications will spend the time to help a writer over the phone.
- Perhaps most important, read several current issues of the target magazine. Only in this way will you see firsthand the kind of stories the magazine actually buys.

Writers who can correctly and consistently discern a publication's audience and deliver stories that speak to that target readership will win out every time over writers who simply write what they write and send it where they will.

What editors want

In nonfiction, editors continue to look for short feature articles covering specialized topics. They want crisp writing and expertise. If you are not an expert in the area about which you are writing, make yourself one through research.

Always query by mail before sending your manuscript package, but keep in mind that once a piece has been accepted, many publishers now prefer to receive your submission via disk or modem so they can avoid re-keying the manuscript.

Fiction editors prefer to receive complete short story manuscripts. Writers must

INSIDER REPORT

USA Weekend seeks freshness, timeliness in stories of national interest

Amy Eisman

"The magazine is aimed at helping people deal with the changing society around them and the issues that they have to face—and it's to help them make decisions in their lives," says *USA Weekend* Managing Editor, Amy Eisman. That editorial focus means the articles that appear in this Sunday magazine running in over 400 newspapers across the country must be up-to-date, of interest to the magazine's diverse readership, and pitched with a unique, fresh angle.

"The best pieces are those that are pegged to current events of national interest," says Eisman. "The stories must look ahead and not behind, so the letters of submission should do the same. If somebody writes us a letter about a story that could have been written two years ago, we're not likely to accept that idea. Writers should be aware of the magazine's timeliness and freshness, and their letters should reflect that." Besides offering a unique look at a timely topic, what else distinguishes an effective pitch letter? "The most successful ones are those that reflect the magazine. They are clear; they get to the point right away."

For writers hoping to target specific subjects for *USA Weekend*, Eisman offers this advice: "Health stories generally cover fitness, nutrition, psychology, behavior, and health trends—not diseases. Entertainment stories are profiles and trend pieces and are often Q&As. Travel stories are service pieces and must be of national interest. Sports stories are profiles of pro athletes and trend stories and include recreational sports." The magazine will occasionally use first-person, family-related material (under its "Family" header, for instance—usually on topics of importance to baby boomers and baby busters who are coping with some kind of nineties dilemma).

To give the editor some idea of the kind of work they do, writers should include two or three clips along with their finely-tuned pitch letter.

keep in mind that marketing fiction is competitive and editors receive far more material than they can publish. For this reason, they often do not respond to submissions unless they are interested in using the story. Before submitting material, check the market's listing for fiction requirements to ensure your story is appropriate for that market. More comprehensive information on fiction markets can be found in *Novel & Short Story Writer's Market* (Writer's Digest Books).

Regardless of the type of writing you do, keep current on trends and changes in the industry. Trade magazines such as *Folio* and *Writer's Digest* will keep you abreast of start-ups and shut downs and other writing business trends.

Payment

Writers make their living by developing a good eye for detail. When it comes to marketing material, the one detail of interest to almost every writer is the question of payment. Most magazines listed here have indicated pay rates; some give very specific payment-per-word rates while others state a range. Any agreement you come to with a magazine, whether verbal or written, should specify the payment you are to receive and when you are to receive it. Some magazines pay writers only after the piece in question has been published. Others pay as soon as they have accepted a piece and are sure they are going to use it.

In *Writer's Market*, those magazines that pay on acceptance have been highlighted with the phrase—"**pays on acceptance**"—set in bold type. Payment from these markets should reach you faster than from those who pay "on publication." There is, however, some variance in the industry as to what constitutes payment "on acceptance"—some writers have told us of two- and three-month waits for checks from markets that supposedly pay "on acceptance." It is never out of line to ask an editor when you might expect to receive payment for an accepted article.

So what is a good pay rate? There are no standards; the principle of supply and demand operates at full throttle in the business of writing and publishing. As long as there are more writers than there are opportunities for publication, wages for freelancers will never skyrocket. Rates vary widely from one market to the next, however, and the news is not entirely bleak. One magazine industry source puts the average pay rate for consumer magazine feature writing at $1.25 a word, with "stories that require extensive reporting . . . more likely to be priced at $2.50 a word." In our opinion, those estimates are on the high side of current pay standards. Smaller circulation magazines and some departments of the larger magazines will pay a lower rate. As your reputation grows (along with your clip file), you may be able to command higher rates.

For more information on magazine industry trends, see Current Trends in Publishing, on page 22.

Information on some publications not included in *Writer's Market* may be found in Consumer Magazines/Changes '94-'95, located at the end of this section.

Since we appeal to all pet owners but must concentrate only four to six pages per species, the editorial has to be intriguing. Features are much more entertaining and diverse. Art, movies, theater, science, adventure can be used to pinpoint some unique aspect of pets and pet ownership. The MULTI-SPECIES concept is most important. Feature ideas have the best chance to succeed. Any article with good photo representation is a plus. *Query first*. Departments are species specific. Remember that the dog and cat person is not the same as the fish and reptile hobbyist. Try to match the species with person. Problems and solutions of keeping different species as pets are wanted most."

Associations

Association publications allow writers to write for national audiences while covering local stories. If your town has a Kiwanis, Lions or Rotary Club chapter, one of its projects might merit a story in the club's magazine. If you are a member of the organization, find out before you write an article if the publication pays members for stories; some associations do not. In addition, some association publications gather their own club information and rely on freelancers solely for outside features. Be sure to find out what these policies are before you submit a manuscript. Club-financed magazines that carry material not directly related to the group's activities are classified by their subject matter in the Consumer and Trade sections.

SHAMAN'S DRUM, A Journal of Experiential Shamanism, Cross-Cultural Shamanism Network, P.O. Box 430, Willits CA 95490-0430. (707)459-0486. Editor: Timothy White. Associate Editor: Carolyn Drewes. 75% freelance written. Quarterly educational magazine of cross-cultural shamanism. "*Shaman's Drum* seeks contributions directed toward a general but well-informed audience. Our intent is to expand, challenge, and refine our readers' and our understanding of shamanism in practice. Topics include indigenous medicineway practices, contemporary shamanic healers and healing practices, ecstatic spiritual practices, and contemporary shamanic psychotherapies. Our overall focus is cross-cultural, but our editorial approach is culture-specific—we prefer that authors focus on specific ethnic traditions or personal practices about which they have significant firsthand experience. We are looking for examples of not only how shamanism has transformed individual lives but also practical ways it can help ensure survival of life on the planet. We want material that captures the heart and feeling of shamanism and that can inspire people to direct action and participation, and to explore shamanism in greater depth." Estab. 1985. Include a SASE or we cannot write you back. We'd be more than happy to look at anything that would be of interest to divorced and stepparents as well articles about grandparents rights. Comic Books

Comic books aren't just for kids. Today, this medium also attracts a reader who is older and wants stories presented visually on a wide variety of topics. In addition, some instruction manuals, classics and other stories are being produced in a comic book format.

This doesn't mean you have to be an artist to write for comic books. Most of these publishers want to see a synopsis of one to two double-spaced pages. Be concise. Comics use few words and rely on graphics as well as words to forward the plot.

Once your synopsis is accepted, either an artist will draw the story from your plot, returning these pages to you for dialogue and captions, or you will be expected to write a script. Scripts run approximately 23 typewritten pages and include suggestions for artwork as well as dialogue. Try to imagine your story on actual comic book pages and divide your script accordingly. The average comic has six panels per page, with a maximum of 35 words per panel.

If you're submitting a proposal to Marvel, your story should center on an already established character. If you're dealing with an independent publisher, characters are often the property of their creators. Your proposal should be for a new series. Include a background sheet for main characters who will appear regularly, listing origins, weaknesses, powers or other information that will make your character unique. Indicate an overall theme or direction for your series. Submit story ideas for the first three issues. If you're really ambitious, you may also include a script for your first issue. As with all markets, read a sample copy before making a submission. The best markets may be those you currently read, so consider submitting to them even if they aren't listed in this section.

Tips: "We *really* need coverage of independent comics companies' products and creators. We need interviews with specific comic strip creators. Most any writer can break in with interviews with hot comic book writers and artists (we really *need* more of the hot ones) – and with comic book creators who don't work for the big two companies. We do *not* want nostalgic items or interviews. Do not burden us with your own personal comic book stories or artwork. We don't have time to evaluate them and can't provide critiques or advice. Get interviews we can't get or haven't thought to pursue. Out-thinking overworked editors is an almost certain way to sell a story."

There's very little we will not consider, *if* it pertains to unique money-making enterprises that can be operated from the home." Buys 10 mss/year. Send complete ms. Length: 500-1,500 words. Pays $150-250. Pays extra for b&w photo and bonus for excellence in longer ms.
Tips: "The most frequent mistake made by writers in completing an article for us is that they think they can simply rewrite a newspaper article and be accepted. That is only the start. We want them to find the article about a successful self-publishing enterprise, and then go out and interview the principal for a more detailed how-to article, including names and addresses. We prefer that writer actually interview a successful self-publisher. Articles should include how idea first came to subject; how they implemented and financed and promoted the project; how long it took to show a profit and some of the stumbling blocks they overcame; how many persons participated in the production and promotion; and how much money was invested (approximately) and other pertinent how-to elements of the story. Glossy photos (b&w) of principals at work in their offices will help sell article."

We do not discriminate against freelancers for lack of prior publications, not having a computer or typewriter, etc. We need people with legal expertise, experience with criminals and/or law enforcement and with access to celebrities. We also need people whose tastes and political viewpoints differ from our own. Our readers have only one thing in common—an open mind. On child stars who have died, all you need do is some research. On living past or present child stars an interview is most often required, but this can be done on the telephone. Most of our readers are adults, but we have many teen and pre-teen readers as well. Our focus is on the positive. We do not publish tabloid or teen magazine style articles."

Fiction: "We do *not* publish any fiction or poetry. *Don't* send any."
Tips: "Other than recommending that you study one or several copies of *Fangoria*, we can only describe it as a horror film magazine consisting primarily of interviews with technicians and filmmakers in the field. Be sure to stress the interview subjects' words—not your own opinions as much. We're very interested in small, independent filmmakers working outside of Hollywood. These people are usually more accessible to writers, and more cooperative. *Fangoria* is also sort of a *de facto* bible for youngsters interested in movie makeup careers and for young filmmakers. We are devoted only to *reel* horrors—the fakery of films, the imagery of the horror fiction of a Stephen King or a Clive Barker—*we do not* want nor would we *ever* publish articles on real-life horrors, murders, etc. A writer must *like* and *enjoy* horror films and horror fiction to work for us. If the photos in *Fangoria* disgust you, if the sight of (*stage*) blood repels you, if you feel 'superior' to horror (and its fans), you aren't a writer for us and we certainly aren't the market for you."

Tips: "Demonstrate ability and inclination to write FC-worthy articles. We read and consider everything we get, and we do print unknowns and first-timers. Probably the writer with a shorter submission (1,000-2,000 words) has a better chance than with an epic article that would fill half the issue."

FILM QUARTERLY, University of California Press, Berkeley CA 94720. (510)601-9070. Fax: (510)601-9036. Editor: Ann Martin. 100% freelance written. Eager to work with new/unpublished writers. Must be familiar with the past and present of the art; must be competently, although not necessarily breezily, written; must deal with important problems of the art. "We write for people who like to think and talk seriously about films, as well as simply view them and enjoy them. We use no personality pieces or reportage pieces. Interviews usually work for us only when conducted by someone familiar with most of a filmmaker's work. (We don't use performer interviews.)" Length: 6,000 words maximum. Pay is about 2¢/word.
Tips: "*Film Quarterly* is a specialized academic journal of film criticism, though it is also a magazine (with pictures) sold in bookstores. It is read by film teachers, students, and die-hard movie buffs, so unless you fall into one of those categories, it is very hard to write for us. Currently, we are especially looking for material on independent, documentary, etc., films not written about in the national film reviewing columns."

The most frequent mistake made by writers in completing an article for us is that they are not sufficiently versed in Armenian history/culture. The articles are too superficial for our audience. We also accept articles or stories dealing with Armenia's neighboring nations and adopted homelands."

Tips: "We do work with new writers and have been delighted to help our writers grow into larger, better paying markets over the years. But please know who we are and who our readers are. Please, don't send an article about your cousin's 'recovery' from having her appendix removed. That isn't what we mean by 'recovery.' Our readers are committed to personal and spiritual growth; many of them are members of 12 Step groups or other self-help programs. Their interests are usually beyond Stage I Recovery. (If you don't know what that means, you need to find out.) If you want to reach our audience, STUDY a sample copy , guidelines and editorial calendar first, then QUERY. Every other month the issue has a theme, for example, Healthy Sexuality, Parenting in Recovery or Recovery from Gambling Addition. Queries that address a theme have the best chance of being published. We emphasize articles/interviews that contain useful, practical information. Shorter pieces (800-1,000 words) are much easier to place. We are open to short, first-person stories of recovery and growth, but again, please take a look at the kinds of stories we've published in the past to get a feel for what we're looking for."

Photos: Send photos with submission. Will not consider submissions without ideas for illustration. Reviews contact sheets, transparencies, 8×10 prints. Captions, model releases, and identification of subjects required. Buys one-time rights.

Tips: "We want crisply written, authoritative narratives for the intelligent lay reader. An Ohio slant may strengthen a submission, but it is not indispensable. Contributors must know enough about their subject to explain it clearly and in an interesting fashion. We use high-quality illustration with all features. If appropriate illustration is unavailable, we can't use the feature. The writer who sends illustration ideas with a manuscript has an advantage, but an often-published illustration won't attract us."
